oriented framework this textbook equips students with the necessary foundation to navigate the legal landscape with confidence

Business Law Nickolas James, 2013-10-21 The third edition of James' innovative text continues to demonstrate business law principles in a clear and accessible style. The objective of a business law subject is to ensure that students acquire sufficient knowledge of the law of business so they can recognise and solve simple legal problems and organise their affairs in order to avoid more complex or serious legal problems and appreciate the connection of legal principles within a range of commercial environments. Because the majority of students are required to study business law as part of either a commerce or business degree, this textbook follows a functional approach to the study of business law rather than doctrinal so the principles of business law are contextualised within a business environment. Business students need to know more than what the law is; they need to know where to find it, how to read it, how to use it, and how it impacts on all facets of business. Students who use this textbook will develop a greater awareness of the law and its broad application to business and commercial environments.

Stranded Assets Ben Caldecott, 2019-12-16 The topic of stranded assets created by environment-related risk factors has risen up the agenda, dramatically influencing many pressing topics in relation to global environmental change. For example, how best to manage the exposure of investments to environment-related risks so that financial institutions can avoid stranded assets, the financial stability implications of stranded assets, and what this means for macroprudential regulation, microprudential regulation, and financial conduct. Reducing the negative consequences of stranded assets by finding ways to address unemployment, lost profits, and reduced tax income, internalising the risk of stranded assets in corporate strategy and decision making, particularly in carbon-intensive sectors susceptible to the effects of societal action on climate change, underpinning arguments by civil society campaigns attempting to secure rapid decarbonisation to reduce the scale of anthropogenic climate change, and designing decarbonisation plans developed by governments as well as companies and investors. Taken as a whole, this book provides some of the latest thinking on how stranded assets are relevant to investor strategy and decision making, as well as those seeking to understand and influence financial institutions. This book was originally published as a special issue of the *Journal of Sustainable Finance and Investment*.
