About U.S. Natural Gas Pipelines United States United States Government,2015-02-18 Nineteen interstate natural gas pipeline systems operate within the Northeast Region Connecticut Delaware Massachusetts Maine New Hampshire New Jersey New York Pennsylvania Rhode Island Virginia and West Virginia These interstate pipelines deliver natural gas to several intrastate natural gas pipelines and at least 50 local distribution companies in the region In addition they also serve large industrial concerns and increasingly natural gas fired electric power generation facilities The natural gas pipeline and local distribution companies serving the Northeast have access to supplies from several major domestic natural gas producing areas and from Canada Domestic natural gas flows into the region from the Southeast into Virginia and West Virginia and from the Midwest into West Virginia and Pennsylvania Canadian imports come into the region principally through New York Maine and New Hampshire About U.s. Natural Gas Pipelines Energy Information

Administration,2015-01-20 Through a series of interconnecting interstate and intrastate pipelines the transportation of natural gas from one location to another within the United States has become a relatively seamless operation While intrastate pipeline systems often transport natural gas from production areas directly to consumers in local markets it is the interstate pipeline system s long distance high capacity trunklines that supply most of the major natural gas markets in the United States

Regulated Enterprise Christopher James Castaneda,1993 Christopher Castaneda s study of the construction of the pipelines that transported southwestern gas to the Northeast traces the ways in which the federal regulatory process fostered competitive growth in the natural gas industry In 1938 the Natural Gas Act granted the Federal Power Commission jurisdiction over the interstate transmission and sale of natural gas The FPC used its new powers to guide shape and manage an intensely competitive period in the industry As Castaneda shows aggressive and politically astute entrepreneurs based in the Southwest took advantage of economic opportunity and a regulatory environment conducive to industry growth They financed and built the nation s longest gas pipelines to connect the massive southwestern reserves with the major northern energy markets The coal industry which supplied the raw product for manufactured gas and the railroad industry which transported the coal adamantly but unsuccessfully opposed the action and attempted to halt the introduction of natural gas into their northeastern markets First during the war years emergency regulatory agencies directed the expansion of the industry into Appalachia Then in the ensuing peacetime market forces prompted entrepreneurs to compete vigorously for regulatory approval to build pipelines to sell natural gas in the Northeast While previous studies have examined the development of the natural gas industry after 1954 when the Supreme Court s Phillips decision established the FPC as a regulator of price control rather than as a manager of industrial growth Castaneda s is the first to examine this earlier entrepreneurial era Based on exhaustive research in corporate records and government documents Regulated Enterprise offers a case study of government business relations during a period of rapid industrial expansion and suggests a
