Access Hidden Of Nokia 225:

Nokia Smartphone Hacks Michael Juntao Yuan, 2005-07-25 Nokia's smartphones pack a powerful computer into a very small space. Unlike your desktop or laptop, your smallest computer can be connected to the Internet all the time and can interact with the world around it through its camera, voice recognition, and its traditional phone keypad. Nokia smartphones combine these features with impressive storage options and a host of networking protocols that make this smallest computer the only thing a road warrior truly needs. If you're still cracking open your laptop or pining for your desktop while you're on the road, you haven't begun to unlock your Nokia's full potential. *Nokia Smartphone Hacks* is dedicated to tricking out your smartphone and finding all the capabilities lurking under the surface. Learn how to unlock your phone so that you can use it with any carrier. Avoid and recover from malicious mobile software. Watch DVD movies on the phone. Use the phone as a remote control. Use the phone as a data modem for your notebook. Check your email and browse the web. Post to your weblog from your phone. Record phone conversations. Choose mobile service plans. Transfer files between the phone and your computer. Whether you want to use your smartphone as your lifeline while you're on the road or you're just looking for a way to make the most of the time you spend waiting in lines, you'll find all the user-friendly tips, tools, and tricks you need to become massively productive with your Nokia smartphone. With *Nokia Smartphone Hacks*, you'll unleash the full power of that computer that's sitting in your pocket, purse, or backpack. **Access**, 2005

WAP-the Wireless Application Protocol Sandeep Singhal, 2001 This book is an example of a unique partnership of motivated technical teammates and would-be competitors coming together to develop a real how-to book on the Wireless Application Protocol (WAP). The authors are all actively working in the wireless and Internet industry on the front line, helping to develop and deliver services to customers using a new wireless Internet standard. They have produced a WAP reference that will become required reading for anyone planning to create applications, author content, or deliver or deploy services to wireless devices. From the Foreword by Gregory G. Williams, Chairman of the WAP Forum: "The mobile Internet builds on a radical shift in the way we work, play, and communicate, extending traditional Internet and Web services to wireless devices such as cellular phones and personal digital assistants (PDAs). This book is about the mobile Internet, the technology that powers it, and how to write content and applications for this new environment. It is both a tutorial and a reference for two major audiences: content and application developers who need clear technical details to guide their work, and business strategists and service providers." **Autocar**, 2003
