Albatross Their World Their Ways:

Albatross Tui De Roy, Julian Fitter, Mark Jones, 2008 Looks at what is known about the albatross a bird of legend and poetry and examines the conditions that are threatening over three quarters of all albatross species with extinction

Albatross Tui De Roy, 2008 The albatross is a creature of legend poetry and dreams But today over three quarters of albatross species are edging towards extinction This book is a celebration of these amazing birds featuring photographs by award winning wildlife photographer Tui De Roy the latest research by leading international experts and a factual natural history

Flight Ways Thom van Dooren, 2014-06-03 A leading figure in the emerging field of extinction studies Thom van Dooren puts philosophy into conversation with the natural sciences and his ethnographic encounters to vivify the cultural and ethical significance of modern day extinctions Unlike other meditations on the subject *Flight Ways* incorporates the particularities of real animals and their worlds drawing philosophers natural scientists and general readers into the experience of living among and losing biodiversity Each chapter of *Flight Ways* focuses on a different species or group of birds North Pacific albatrosses Indian vultures an endangered colony of penguins in Australia Hawaiian crows and the iconic whooping cranes of North America Written in eloquent and moving prose the book takes stock of what is lost when a life form disappears from the world the wide ranging ramifications that ripple out to implicate a number of human and more than human others Van Dooren intimately explores what life is like for those who must live on the edge of extinction balanced between life and oblivion taking care of their young and grieving their dead He bolsters his studies with real life accounts from scientists and local communities at the forefront of these developments No longer abstract entities with Latin names these species become fully realized characters enmeshed in complex and precarious ways of life sparking our sense of curiosity concern and accountability toward others in a rapidly changing world

Albatross Graham Barwell, 2013-10-15 At length did cross an Albatross Through the fog it came As if it had been a Christian soul We hailed it in God's name The introduction of the albatross in Samuel Taylor Coleridge's *The Rime of the Ancient Mariner* remains one of the most well known references to this majestic seabird in Western culture In *Albatross* Graham Barwell goes beyond Coleridge to examine the role the bird plays in the lives of a wide variety of peoples and societies from the early views of north Atlantic mariners to modern encounters by writers artists and filmmakers Exploring how the bird has been celebrated in proverbs folk stories art and ceremonies Barwell shows how people marvel at the way the albatross soars through the air covering awe inspiring distances with little effort thanks to its impressive wingspan He surveys the many approaches people have taken to thinking about the albatross over the past two hundred years from those who devoted their lives to these birds to those who hunted them for food and sport and discusses its place in the human imagination Concluding with a reflection on the bird's changing significance in the modern world Barwell considers threats to its continued existence and its prospects for the future With one hundred illustrations from nature film and popular culture *Albatross* is an absorbing look at these beautiful birds

Antarctic, 2008 **Ahab's Rolling Sea** Richard J. King, 2019-11-11 In this invigorating study a maritime historian delves into the environmental and scientific concerns beneath the surface of Melville's epic tale *Nature*. One of the most profound and enduring works of American fiction, Herman Melville's *Moby Dick* is also a landmark of nature writing. In conversation with the works of Emerson and Thoreau, this epic of the sea draws on Melville's own travels to the Pacific. The author spent more than three years at sea before writing his masterpiece in 1851. *Ahab's Rolling Sea* is a chronological journey through the natural history of Melville's novel. From white whales to whale intelligence, giant squids, barnacles, albatross, and sharks, Richard J. King examines what Melville knew from his own experiences and the sources available to a reader in the mid 1800s, exploring how and why Melville might have twisted what was known to serve his fiction. King then climbs to the crow's nest, setting Melville in the context of the American perception of the ocean in 1851, at the very start of the Industrial Revolution and just before the publication of *On the Origin of Species*. King compares Ahab's and Ishmael's worldviews to how we see the ocean today, an expanse still immortal and sublime but also in crisis. Featuring a coffer of illustrations and an array of interviews with contemporary scientists, fishers, and whale watch operators, *Ahab's Rolling Sea* offers new insight into a cherished masterwork, its adventurous author, and our own evolving relationship with the briny deep.

Move Like Water: My Story of the Sea Hannah Stowe, 2023-09-19 Winner 2024 Banff Mountain Book Award for Adventure Travel. A sensuous book more felt than described, more described than explained, more painted than penned, part memoir, part journal, and part natural mystery tour. Carl Safina, *The New York Times Book Review*. A book to sweep you away from the shore into a wild world of water, whale, storm, and starlight, to experience what it's like to sail for weeks at a time with life set to a new rhythm. As a young girl, Hannah Stowe was raised at the tide's edge on the Pembrokeshire coast of Wales, falling asleep to the sweep of the lighthouse beam. Now in her midtwenties, working as a marine biologist and sailor, Stowe draws on her professional experiences sailing tens of thousands of miles in the North Sea, North Atlantic, Mediterranean, Celtic Sea, and the Caribbean to explore the human relationship with wild waters. Why is it, she asks, that she and so many others have been drawn to life at sea, and what might the water around us be able to teach us? Braiding her powerful and deeply personal narrative and illustrations with stories of six keystone marine creatures—the fire crow, sperm whale, wandering albatross, humpback whale, shearwater, and the barnacle—Stowe invites readers to fall in love as she has with the sea and those that call it home, and to discover the majesty, wonder, and vulnerability of the underwater world. For fans of Rachel Carson and Annie Dillard, *Move Like Water: My Story of the Sea* is an inspiring, heartfelt hymn to the sea, a testament to finding and following a dream, and an unforgettable introduction to a deeply gifted nature writer of a new generation.

Exuberant Life William H. Durham, 2021 *Exuberant Life* explains how understanding the vulnerability and resilience of unbothered species in a place like Galapagos is indispensable in planning for the conservation and sustainable future of all species on Earth. **Captured: The Animal within Culture** M. Boyde, 2013-11-20 In 2008 the youtube video documenting

the emotional reunion between two men and Christian the Lion became a worldwide sensation Key themes of the essays in *Captured the Animal within Culture* are encapsulated in Christian s story the implications of the physical and cultural capture of animals Galapagos at the Crossroads Carol Ann Bassett,2009 Natural History
