The Fashion Design Manual is a comprehensive introduction to the world of fashion. It introduces the reader to the cycles and trends of fashion, the principles and practice of fashion design, the range of techniques and skills required to be successful in the industry, and the economic reality of the world of retail fashion. The Fashion Design Manual follows the path a garment takes from sketch to sample through production and finally via the retail outlet to the wearer. The book is very generously illustrated with drawings, sketches, and photographs throughout.

Apparel Merchandising Jeremy A. Rosenau, David L. Wilson, 2001-12-01

Apparel Merchandising: The Line Starts Here is a comprehensive approach to apparel merchandising from the perspective of the apparel producer. Rosenau and Wilson draw on their extensive backgrounds in the industry as senior and chief executives covering men's tailored clothing, men's and women's sportswear and activewear, and children's wear in both domestic and international markets. This practical industry expertise and access to industry resources combined with their experience in higher education give them a unique perspective to create a focused and stimulating textbook unlike any currently available. This text follows the evolution of the merchandising function from its historic roots in two seasons per year and minimal style changes with emphasis on production efficiency to today's seasonless, consumer-driven fashion-oriented real-time global market. This entails a focus on product development and the philosophies and perspective of industry executives. Finally, the authors capture the interface of merchandising with the marketing and manufacturing departments and the way these functions integrate in an effective team concept.

Instructor's Guide includes course syllabus, answers to discussion questions and activities, and project ideas.
