includes Let's Review Regents Global History and Geography in addition to Regents Exams and Answers Global History and Geography *Essays on Twentieth-Century History* Michael Adas, American Historical Association, 2010-05-28 Probing the paradoxes of the long twentieth century Unprecedented human opportunity and deprivation to the rise of the United States as a hegemon *International Law And Armed Conflict, Exploring the Faultlines* Michael N. Schmitt, Jelena Pejic, 2007 International law and armed conflict exist in a symbiotic relationship In some cases law shapes conflict proactively by imposing normative limits in advance of the appearance of proscribed conduct Much more commonly armed conflict either reveals lacunae in the law or demonstrates how law designed for yesterday's wars falls short when applied to contemporary conflict When that happens international law reacts by allowing provisions to fall into desuetude embracing new interpretations of existing prescriptions or generating new norms through practice or codification In the 21st Century both international security and armed conflict are the subject of arguably unprecedented sea changes As a result claims that both the jus ad bellum and jus in bello are unwieldy and ill fitting in the context of modern hostilities have surfaced prominently Whether one agrees with such dire assessments what has become clear is that armed conflict is increasingly exposing faultlines in the law governing the resort to force The intent of this collection of essays in honour of Professor Yoram Dinstein on the occasion of his 70th birthday is to explore such faultlines first by identifying them and then by assessing their consequences In a sense then the essays contributed by the top minds in the field will serve to assist academics and practitioners to anticipate pressure on the law governing armed conflict and to the extent possible react accordingly Paralleling Professor Dinstein's classic works War Aggression and Self Defence and The Conduct of Hostilities Under the Law of International Armed Conflict the book addresses both ius ad bellum and ius in bello topics **A Global History of the Nuclear Arms Race** Richard Dean Burns, Joseph M. Siracusa, 2013-04-23 Written by two preeminent authors in the field this book provides an accessible global narrative of the nuclear arms race since 1945 that focuses on the roles of key scientists military chiefs and political leaders The first book of its kind to provide a global perspective of the arms race this two volume work connects episodes worldwide involving nuclear weapons in a comprehensive narrative fashion Beginning with a discussion of the scientific research of the 1930s and 1940s and the Hiroshima decision the authors focus on five basic themes political dimensions technological developments military and diplomatic strategies and impact The history of the international nuclear arms race is examined within the context of four historical eras America's nuclear monopoly America's nuclear superiority superpower parity and the post Cold War era Information about the historical development of the independent deterrence of Britain France and China as well as the piecemeal deterrence of newcomers Israel India Pakistan and North Korea is also included as is coverage of the efforts aimed at the international control of nuclear weapons and the diplomatic architecture that underpins the global nuclear non proliferation regime *Guibert's General Essay on Tactics* Jonathan Abel, 2021-10-18 Winner of the Society for Military History Distinguished Book Award 2023 Reference The God of
