Astropolitik Classical Geopolitics In The Space Age Strategy And History:

Astropolitik Everett C. Dolman, 2005-07-15 This volume identifies and evaluates the relationship between outer space geography and geographic position astrogeography and the evolution of current and future military space strategy In doing so it explores five primary propositions *Strategy and History* Colin S. Gray, 2007-01-24 This book comprises some of the most important contributions to the strategic debate over the past thirty years by a leading theorist and practitioner

Perspectives on Strategy Colin S. Gray, 2013-03-28 *Perspectives on Strategy* examines in depth five aspects of strategy Strategic thought and behaviour are explored and explained from the perspectives of intellect morality culture geography and technology Each perspective has attracted persisting controversy *Perspectives on Strategy* is strongly complementary to the author's previous book *The Strategy Bridge Theory for Practice* OUP 2010 This new work takes a notably holistic view of strategic phenomena which serves as a master framework within which detailed examination of strategic history and issues can usefully be pursued in the light of particular perspectives Foundational for the argument in *Perspectives on Strategy* is the proposition that distinctive aspects of strategy e.g. ethics culture inter alia can only be appreciated properly when they are regarded in context The author shares this view with T.E. Lawrence of Arabia who wrote of the whole house of war *Perspectives on Strategy* gratefully adapts Lawrence and writes about the whole house of strategy The book insists that the nature of strategy is best represented by a Venn diagram that shows overlapping perspectives Thus the subject of each chapter is shown as having meaning for and in turn is influenced by the subjects of the other chapters For example the book explores the importance of strategic ideas relative to the significance of the material weapons of war The author poses the hardest of questions pertinent to each chosen perspective e.g. do ideas matter more than muscle in practice how robust is the ethical code with which warfare is waged is geography destiny as some theorists have claimed and do technically superior weapons win wars *Perspectives on Strategy* demonstrates that it is possible to look closely at strategic matters from limited but arguably powerful perspectives without being captured by them This book asks and answers the most challenging and rewarding questions that can be posed in order to reveal the persisting universal nature but ever changing character of strategy **Weapons in Space** Aaron Bateman, 2024-05-07 A new and provocative take on the formerly classified history of accelerating superpower military competition in space in the late Cold War and beyond In March 1983 President Ronald Reagan shocked the world when he established the Strategic Defense Initiative SDI derisively known as Star Wars a space based missile defense program that aimed to protect the US from nuclear attack In *Weapons in Space* Aaron Bateman draws from recently declassified American European and Soviet documents to give an insightful account of SDI situating it within a new phase in the militarization of space after the superpower détente fell apart in the 1970s In doing so Bateman reveals the largely secret role of military space technologies in late Cold War US defense strategy and foreign relations In contrast to existing narratives *Weapons in Space* shows how tension over the role of military space technologies in American statecraft

was a central source of SDI's controversy even more so than questions of technical feasibility. By detailing the participation of Western European countries in SDI research and development, Bateman reframes space militarization in the 1970s and 1980s as an international phenomenon. He further reveals that even though SDI did not come to fruition, it obstructed diplomatic efforts to create new arms control limits in space. Consequently, *Weapons in Space* carries the legacy of SDI into the post-Cold War era and shows how this controversial program continues to shape the global discourse about instability in space and the growing anxieties about a twenty-first century space arms race.

The Province of All Mankind Stephen

Buono, 2025-07-15 *The Province of All Mankind* is the story of a powerful idea about the cosmos. Born in the science fiction literature of the nineteenth century and maturing in the Age of Apollo, this idea held that outer space should be preserved as a sanctuary from human strife, free from weapons, warfare, and political rivalry. If humanity could somehow leave violence behind as it moved into space, perhaps peace would finally reign. Bucking a half-century of space race scholarship, Stephen Buono argues that despite waging a totalizing Cold War, the United States achieved stunning diplomatic successes that heralded the cosmos as a realm of peace and cooperation. The early story of space politics is not primarily one of militarization but rather of political prescience and restraint. *The Province of All Mankind* demonstrates that space became a unique domain of American foreign relations and international law and provides lessons for the Second Cold War unfolding over the horizon.

Science, Strategy and War Frans P.B. Osinga, 2007-01-24 John Boyd is often known exclusively for the so-called OODA loop model he developed. This model refers to a decision-making process and to the idea that military victory goes to the side that can complete the cycle from observation to action the fastest. This book aims to redress this state of affairs and re-examines John Boyd's original contribution to strategic theory. By highlighting diverse sources that shaped Boyd's thinking and by offering a comprehensive overview of Boyd's work, this volume demonstrates that the common interpretation of the meaning of Boyd's OODA loop concept is incomplete. It also shows that Boyd's work is much more comprehensive, richer, and deeper than is generally thought. With his ideas featuring in the literature on Network Centric Warfare, a key element of the US and NATO's so-called military transformation programmes, as well as in the debate on Fourth Generation Warfare, Boyd continues to exert a strong influence on Western military thinking. Dr. Osinga demonstrates how Boyd's work can help us to understand the new strategic threats in the post-9/11 world and establishes why John Boyd should be regarded as one of the most important post-modern strategic theorists.

Grand Strategy and the Presidency

C. Dale Walton, 2012-02-20 This book examines the role and importance of the Presidency in the formulation and conduct of US grand strategy. The text discusses US strategic history with particular emphasis on the period from the end of the Cold War to the present day. While the United States periodically has enjoyed exceptional presidential leadership in the past, this book argues that few future presidents will meet high standards of leadership in foreign affairs. In turn, this will undermine the ability of the United States to construct and maintain a coherent grand strategy appropriate to the multipolar world of

the twenty first century Grand Strategy and the Presidency explores the role that the holders of the presidential office have played in the past development of the United States as a great power Drawing upon examples from history the textual analysis is shaped around the description of the long term strategic development of the United States The author then considers what the events of recent decades portend for the future of US strategy and foreign policy This book will be of interest to students of Presidential Studies US foreign policy Strategic Studies and IR Security Studies in general

Privatizing Peace Wendy N. Whitman Cobb, 2020-06-15 This book explores the privatization of space and its global impact on the future of commerce peace and conflict As space becomes more congested contested and competitive in the government and the private arenas the talk around space research moves past NASA's monopoly on academic and cultural imaginations to discuss how Elon Musk's SpaceX and Jeff Bezos Blue Origin is making space cool again This volume addresses the new rhetoric of space race and weaponization with a focus on how the costs of potential conflict in space would discourage open conflict and enable global cooperation It highlights the increasing dependence of the global economy on space research its democratization plunging costs of access and growing economic potential of space based assets

Thoughtful nuanced well documented this book is a must read for scholars and researchers of science and technology studies space studies political studies sociology environmental studies and political economy It will also be of much interest to policymakers bureaucrats think tanks as well as the interested general reader looking for fresh perspectives on the future of space

Global Geostrategy Brian Blouet, 2020-09-23 This is a new examination of Halford Mackinder's seminal global geostrategic work from the perspective of geography diplomatic history political science international relations imperial history and the space age Mackinder was a man ahead of his time He foresaw many of the key strategic issues that came to dominate the twentieth century Until the disintegration of the Soviet

Union western defence strategists feared that one power or alliance might come to dominate Eurasia Admiral Mahan discussed this issue in *The Problem of Asia* 1900 but Mackinder made the most authoritative statement in *The Geographical Pivot of History* 1904 He argued that in the closed Heart Land of Euroasia was a strategically placed region with great resources that if controlled by one force could be the basis of a World Empire James Kurth in *Foreign Affairs* has commented that it has taken two World Wars and the Cold War to prevent Mackinder's prophecy becoming reality In World War I and World War II Germany achieved huge territorial gains at the expense of the Russian empire and the Soviet Union In the former conflict the Russian empire was defeated by Germany but the western powers insisted that the territorial gains made by Germany at the treaty of Brest Litovsk be given up In World War II Britain and the US gave material support to Stalin's totalitarian regime to prevent Nazi Germany gaining control of the territory and resources that might have been a basis for world domination The west highly conscious of Mackinder's dictum 1919 that Who rules East Europe commands the Heartland quickly adopted policies to contain the Soviet Union History has therefore proved Mackinder's work to be of vital importance to generations of strategic thinking and he remains a key influence in the new millennium This book will be of great interest to all students and scholars of strategic studies and military history and of geopolitics in particular
