At This Time Of Year A Time Travel Novella:

Wells Meets Deleuze Michael Starr, 2017-06-14 The writings of H G Wells have had a profound influence on literary and cinematic depictions of the present and the possible future and modern science fiction continues to be indebted to his scientific romances such as *The Time Machine* *The War of the Worlds* and *The Island of Doctor Moreau* Interpreted and adapted for more than a century Wells's texts have resisted easy categorization and are perennial subjects for emerging critical and theoretical perspectives The author examines Wells's works through the post structuralist philosophy of Gilles Deleuze Via this critical perspective concepts now synonymous with science fiction such as time travel alien invasion and transhumanism demonstrate the intrinsic relevance of Wells to the genre and contemporary thought **Here Be Dragons:**

Three Science Fiction Novellas J. H. Rosny, 2012-01-01 Probably the greatest of all French speaking science fiction writers after Jules Verne I was unprepared for the power and beauty Michael Dirda The Washington Post To the short list that includes Jules Verne and H G Wells as founding fathers of science fiction the name of the Belgian writer J H Rosny A n must be added He was the first writer to conceive and attempt to narrate the workings of aliens and alternate life forms His fascination with evolutionary scenarios and long historical vistas from first man to last man are important precursors to the myriad cosmic epics of modern science fiction Until now his work has been virtually unknown and unavailable in the English speaking world but it is crucial for our understanding of the genre Three wonderfully imaginative novellas are included in this volume The Xipehuz is a prehistoric tale in which the human species battles strange geometric alien life forms Another World is the story of a mysterious being who does not live in the same acoustic and temporal world as humans The Death of the Earth is a scientifically uncompromising Last Man story The book also includes an insightful critical introduction that places Rosny s work within the context of evolutionary biology Rosny was a species pluralist and believed that human beings are no more entitled than any other creature to reign supreme He would have felt right at home among the Men In Black Laura Miller The New Yorker

Debus,2024-10-04 The incomprehensible notion of a very large chunk of ice or rock from outer space smashing into the Earth has only become mainstream within the past two centuries Though early writers imagined the utterly fantastic consequences of comet collisions and speculated on the devastation they might wreak it was not until the 1980s when scientists finally resolved that dinosaurs were extinguished by an asteroid 66 million years ago This startling announcement captivated the media and tilted the science fiction world but in reality history may have been punctuated repeatedly by such events This book collects and analyzes ideas of asteroid comet and planetary impacts with Earth spanning two centuries from the first realization of extinctions in fossil records to the new millennium reflected in scores of sci fi stories films and televised science documentaries The author examines social and geopolitical fears tied to the prospect of a cosmic borne catastrophe Science fiction and speculation are artfully melded The Replaceability Paradigm Niall Martin,Ilios Willemars,2024-06-04 The

trope of humans being replaced by AI is one of the most familiar examples of the rhetoric of replaceability Not only have questions about what is unique and what is replaceable gained momentum in digital culture but notions of fungibility have emerged in many other contexts as well such as ecology management theory and more sinisterly in racist and conspiracist thinking This volume argues that there is a replaceability paradigm at work throughout the culture of modernity from the European Renaissance through Freudian psychoanalysis Chinese science fiction and postcolonial theory all the way to neural network programs such as Google's DeepDream This collection will be of interest to anybody engaged with the conceptual architecture of contemporary culture whether through film literature or new digital media **Necroscope: The Novellas**

exist One such is the long dead August Ferdinand M bius himself the German astronomer mathematician and discoverer of the eponymous M bius Strip which led him to explore posthumously his previously conjectural Continuum and the other is Harry s son who has not only inherited his father s mathematical skill but also the metaphysical talent by means of which the Necroscope converses with dead people in their graves Picture Harry s confusion then on returning home via the M bius Continuum from an adventure in Las Vegas as he witnesses however briefly a flailing figure hurtling conscious but uncontrolled through the endless midnight of the Continuum Who could this be how can it be that a helpless silently protesting other is rushing meteor like across the Continuum s Stygian vault Moreover if he hasn t arrived here voluntarily then what vile murderer has sent his victim on this monstrous journey to the end of life itself For Harry is sure that this is neither his son s nor Professor M bius doing Who and where is he this M bius murderer It is a mystery that only the Necroscope can ever hope to solve but at what risk to his own life
