

Super Abrasion Resistant Air Permeable Fabric

The unique construction of WearSlide combines the best features of non-woven polyester with the durability of rubber. The result is an easy-to-install, long lasting and durable, abrasion resistant air permeable fabric in a class by itself. Its rubber impregnated fibers and non-woven construction provide exact tolerances in thickness, texture and, most importantly, permeability, which makes WearSlide the ideal airstide fabric. Available in two different permeability values. It can be used in both open and closed airstides to handle a wide variety of materials including cement, alumina, fly ash, silica, barite, flour, resins, kaolin, and many other dry bulk powders that lend themselves to fluidization.

WearSlide Features

- Easy to install – no stretching required
- Cut and gouge resistant due to polyester/rubber construction
- Uniform and consistent permeability
- Will not fray or unravel when cut or shaped
- Excellent bolt holding strength
- Lateral rigidity minimizes sag
- Polyester/rubber construction resistant to dry rot and mildew
- Needled construction reduces "blinding" common with woven fabrics
