Alvar Aalto Architecture Modernity And Geopolitics:

Alvar Aalto Eeva-Liisa Pelkonen, 2009 An intellectual biography that reconsiders the influence of Aalto's Finnish origins and explores geography as a dominant theme in the history of modern architecture Perhaps no other great modern architect has been linked to a native country as closely as Alvar Aalto 1898-1976 Critics have argued that the essence of Finland flows as if naturally into his quasi organic forms ranging from such buildings as the Baker House in Cambridge Massachusetts to iconic 20th century designs including his Savoy vase and bent plywood stacking stools What did Aalto himself say about the importance of nationalism and geography in his work and in architecture generally With an unprecedented focus on the architect's own writings library and critical reception Eeva Liisa Pelkonen proposes a dramatically different interpretation of Aalto's oeuvre revealing it as a deeply thoughtful response to his intellectual and cultural milieu especially to Finland's dynamic political circumstances following independence from Russia in 1917 Pelkonen also considers the geographic and geopolitical narratives found in his writings These include ideas about national style and national cultural revival and about how architecture can foster cosmopolitanism internationalism and regionalism Expanding the canonical reading of Aalto this work promises to influence future inquiries on Aalto for generations to come **Alvar Aalto** Eeva-Liisa Pelkonen, 2009

Perhaps no other great modern architect has been linked to a native country as closely as Alvar Aalto 1898-1976 Critics have argued that the essence of Finland flows as if naturally into his quasi organic forms ranging from such buildings as the Baker House in Cambridge Massachusetts to iconic 20th century designs including his Savoy vase and bent plywood stacking stools What did Aalto himself say about the importance of nationalism and geography in his work and in architecture generally With an unprecedented focus on the architect's own writings library and critical reception Eeva Liisa Pelkonen proposes a dramatically different interpretation of Aalto's oeuvre revealing it as a deeply thoughtful response to his intellectual and cultural milieu especially to Finland's dynamic political circumstances following independence from Russia in 1917 Publisher's description *Modern Architecture and the Sacred* Ross Anderson, Maximilian Sternberg, 2020-11-26 This edited volume *Modern Architecture and the Sacred* presents a timely reappraisal of the manifold engagements that modern architecture has had with the sacred It comprises fourteen individual chapters arranged in three thematic sections Beginnings and Transformations of the Modern Sacred Buildings for Modern Worship and Semi Sacred Settings in the Cultural Topography of Modernity The first interprets the intellectual and artistic roots of modern ideas of the sacred in the post Enlightenment period and tracks the transformation of these in architecture over time The second studies the ways in which organized religion responded to the challenges of the new modern self understanding and then the third investigates the ways that abstract modern notions of the sacred have been embodied in the ersatz sacred contexts of theatres galleries memorials and museums While centring on Western architecture during the decisive period of the first half of the 20th century a time that takes in the early musings on spirituality by some of the avant garde in defiance of Sachlichkeit and the machine aesthetic

the volume also considers the many varied appropriations of sacrality that architects have made up to the present day and also in social and cultural contexts beyond the West

Modern Architecture and the Mediterranean Jean-Francois Lejeune, Michelangelo Sabatino, 2009-12-04 Bringing to light the debt twentieth century modernist architects owe to the vernacular building traditions of the Mediterranean region this book considers architectural practice and discourse from the 1920s to the 1980s The essays here situate Mediterranean modernism in relation to concepts such as regionalism nationalism internationalism critical regionalism and postmodernism an alternative history of the modern architecture and urbanism of a critical period in the twentieth century

Modern Architecture: A Critical History (Fifth) (World of Art) Kenneth Frampton, 2020-09-08 An extensively revised and updated edition of a bestselling classic on modern architecture and its origins by Kenneth Frampton Kenneth Frampton's highly acclaimed survey of modern architecture and its origins has been a classic since it first appeared in 1980 Starting with the cultural developments since 1750 that drove the modern movement moving through the creation of modern architecture and exploring the effects of globalization and the phenomenon of international celebrity architects this book is the definitive history of modern architecture For this extensively revised and updated fifth edition of *Modern Architecture* Frampton added new chapters exploring the ongoing modernist tradition in architecture while also examining the varied responses to the urgent need to build more sustainably and create structures that will withstand changing climates This new edition features completely redesigned interiors and an updated and expanded bibliography making this volume more indispensable than ever

Alvar Aalto and Urban Design Robert Cody, Angela Amoia, 2025-10-24 This book provides a fresh look at Alvar Aalto's regional and community planning work particularly the ways in which he incorporated sustainability resiliency energy and health and examines how contemporary architects and planners can learn from this approach for the betterment of 21st century urban design and our future cities The Alvar Aalto Atelier planned and promoted regional development that combined ecological features considered density and offered a framework for informality including flexible adaptable infrastructures with physical plans integrating communities with nature These plans were largely suburban and contained vital lessons on how to deal with sprawl traffic landscape energy labor and industry This book analyzes letters writings and drawings not seen outside the Alvar Aalto Foundation to review alternative ways to examine suburban landscapes and urban typologies through sustainability ecology and use of digital technologies This is an essential read for all those interested in the urban design work of Alvar Aalto Written in an accessible way for those new to the work of Aalto *Architecture and Urban Design* students of all levels will also find this a helpful guide on ecologically and socially responsible design

The Baroque in Architectural Culture, 1880-1980 Andrew Leach, John Macarthur, 2016-03-09 In his landmark volume *Space Time and Architecture* Sigfried Giedion paired images of two iconic spirals Tatlin's Monument to the Third International and Borromini's dome for Sant Ivo alla Sapienza The values shared between the baroque age and the modern were thus encapsulated on a single page spread

As Giedion put it writing of Sant Ivo Borromini accomplished the movement of the whole pattern from the ground to the lantern without entirely ending even there And yet he merely groped towards that which could be completely effected in modern architecture achieving the transition between inner and outer space The intellectual debt of modern architecture to modernist historians who were ostensibly preoccupied with the art and architecture of earlier epochs is now widely acknowledged This volume extends this work by contributing to the dual projects of the intellectual history of modern architecture and the history of architectural historiography It considers the varied ways that historians of art and architecture have historicized modern architecture through its interaction with the baroque a term of contested historical and conceptual significance that has often seemed to shadow a greater contest over the historicity of modernism Presenting research by an international community of scholars this book explores through a series of cross sections the traffic of ideas between practice and history that has shaped modern architecture and the academic discipline of architectural history across the long twentieth century The editors use the historiography of the baroque as a lens through which to follow the path of modern ideas that draw authority from history In doing so the volume defines a role for the baroque in the history of architectural historiography and in the history of modern architectural culture

Pride in Modesty Michelangelo Sabatino, 2011-05-21 Following Italy's unification in 1861 architects artists politicians and literati engaged in volatile debates over the pursuit of national and regional identity Growing industrialization and urbanization across the country contrasted with the rediscovery of traditionally built forms and objects created by the agrarian peasantry *Pride in Modesty* argues that these ordinary often anonymous everyday things inspired and transformed Italian art and architecture from the 1920s through the 1970s Through in depth examinations of texts drawings and buildings Michelangelo Sabatino finds that the folk traditions of the pre industrial countryside have provided formal practical and poetic inspiration directly affecting both design and construction practices over a period of sixty years and a number of different political regimes This surprising continuity allows Sabatino to reject the division of Italian history into sharply delimited periods such as Fascist Interwar and Democratic Postwar and to instead emphasize the long continuous process that transformed pastoral and urban ideals into a new modernist Italy

German Façade Design Randall Ott, 2016-09-17 German architecture prior to the modern period has received less systemic analytical study than that of Italy France and Britain Scholarly discussion of broad traditions or continuities within Germanic or Central European façade design is even sparser Baroque era studies of the region mostly devote themselves to isolated architects monuments or movements Modernism's advent decisively changed this Germanic architecture enjoyed sudden ascendancy Yet even so study specifically of that region's façades still lagged nothing compares to the dozens of treatments of Le Corbusier's façade systems for example and how these juxtapose with French neoclassical or Italian Renaissance methods Given the paucity of multi period studies one can be forgiven for believing Germany's effervescence of radical modern works seems unprecedented This book takes up these multiple quandaries It identifies and

documents a previously unrecognized compositional tradition characterized here as the screen facade and posits it as a counter narrative critiquing the essentialist authentic canon currently dominant in Western architectural history By crossing evenly over the dividing line between the historical and modern periods it offers valuable insights on indigenous roots underlying some aspects of Germany's invigorating early twentieth century architectural developments The book chronologically examines 400 years of closely related facades concentrated in Germany but also found in Austria the Czech Republic German speaking Switzerland and nearby areas of Central Europe While nearly 75 buildings are mentioned and illustrated a dozen are given extensive analysis and the book focuses on the works of three architects Schinkel Behrens and Mies Relationships between examples of these three architects' facades far transcend mere homage amongst masters Glimmers of the system they eventually codify are apparent as early as at Heidelberg Castle in 1559 and Nürnberg's Rathaus in 1622 The book argues that in Germany northern Gothic affinities for bisection intense repetition and rote aggregation intersected with southern Classical affinities for symmetry hierarchy and centrality thereby spawning a unique hybrid product the screen facade Instead of graphic formality this study is guided by on site perceptions propositional contrasts means of approach interpretive conflicts and emotion and it relates the design of these facades to concepts proposed by contemporary philosophers including Novalis Hegel Nietzsche Freud Adorno and most importantly Gadamer on hermeneutics

Team 10 East Lukasz Stanek, 2014-05-15 This volume coins the term Team 10 East as a conceptual tool to discuss the work of Team 10 members and fellow travelers from state socialist countries such as Oskar Hansen of Poland Charles Polanyi of Hungary and Radovan Nikšić of Yugoslavia This new term allows the book's contributors to approach these individuals from a comparative perspective on socialist modernism in Central and Eastern Europe and to discuss the relationship between modernism and modernization across the Iron Curtain In so doing Team 10 East addresses revisionism in state socialist architecture and politics as well as shows how Team 10 East architects appropriated critiqued and developed postwar modernist architecture and functionalist urbanism both from within and beyond the confines of a Europe split by the Cold War
