Leading and Managing Open and Distance e-Learning (ODEL) Institutions in Africa

Cuthbert Majoni,2022-10-18 Leading and Managing Open and Distance E Learning ODeL Institutions in Africa focuses on e learning especially in developing countries in Africa The outbreak of COVID 19 has forced most educational institutions including conventional institutions in higher education to embrace e learning as a tool to ensure that education is not paralysed but continues to thrive However the major challenge has been shifting focus from the conventional face to face mode to the e learning mode This calls for a change of mindset and a review of practices to ensure success in implementing e learning This book has 12 chapters that explore the leadership theories and approaches that influence administrative practices in ODeL institutions as well as student support within library and information services the complexities of student affairs the inclusion of students with special needs the contemporary issues of innovation and industrialisation and effective marketing techniques for the survival and growth of tertiary institutions It is hoped that the recipients of this book can acquire the theoretical and practical knowledge relevant to the successful implementation of e learning

Handbook of Research on Global Institutional Roles for Inclusive Development Baporikar, Neeta,2022-06-24 With the history of multilateral governance and the impact of the global pandemic there is no doubt that we are at a transition between the system that marked the decades after the Second World War and a more extensive system of international governance that will characterize the world for the next generation That system may keep the long standing promise to serve the world s least advantaged or it may serve to marginalize them further For more than a century and a half the most powerful national governments have created institutions of multilateral governance that promise to make a more inclusive world a world serving women working people the colonized the backward the destitute and the despised That promise and the real impact need deliberation and discussion The Handbook of Research on Global Institutional Roles for Inclusive Development examines the concepts that have powerfully influenced development policy and more broadly examines the role of ideas in these institutions and how they have affected the current development discourse It enhances the understanding of how these ideas travel within systems and how they are translated into policy modified distorted or resisted Covering topics such as

ethical consumption academic migration and sustainable global capitalism this book is an essential resource for government officials activists management academicians researchers students and educators of higher education and educational administration and faculty *The Dynamics of Changing Higher Education in the Global South* Busani Mpofu, Sabelo Ndlovu-Gatsheni, 2020-06-29 Today there are generally universities in Africa rather than African universities The legitimacy of the university in Africa is under serious questions now because of its complicity in racism patriarchy sexism colonialism capitalism genocide epistemicide linguicide culturecide and alienation In other words the university in Africa as we know it today is elitist and exclusionary Therefore rethinking the idea of the university is fundamental to overcoming its current deficiencies in the Global South This volume bringing together a number of national case studies and macro analyses on the dynamics of changing higher education in the Global South gestures towards the desired imagined decolonial African university which should be a site of multilingualism where African indigenous languages cosmologies and ontologies become a central part of its identity and soul intolerant of epistemicides linguicides and cultural imperialism but a site of cognitive and social justice that fully embraces the idea that all human beings are born into valid useful relevant and legitimate knowledge systems **William Blake as Natural Philosopher, 1788-1795** Joseph Fletcher, 2021-12-07 William Blake as Natural Philosopher 1788 1795 takes seriously William Blake's wish to be read as a natural philosopher particularly in his early works and illuminates the way that poetry and visual art were for Blake an imaginative way of philosophizing Blake's poetry and designs reveal a consistent preoccupation with eighteenth century natural philosophical debates concerning the properties of the physical world the nature of the soul and God's relationship to the material universe This book traces the history of these debates and examines images and ideas in Blake's illuminated books that mark the development of the monist pantheism in his early works which contend that every material thing is in its essence God to the idealism of his later period which casts the natural world as degenerate and illusory The book argues that Blake's philosophical thought was not as monolithic as has been previously characterized and that his deepening engagement with late eighteenth century vitalist life sciences including studies of the asexual propagation of the marine polyp marks his metaphysical turn In contrast to the vast body of scholarship that emphasizes Blake's early religious and political positions William Blake as Natural Philosopher draws out the metaphysics underlying his commitments In so doing the book demonstrates that pantheism is important because it entails an ethics that respects the interconnected divinity of all material objects not just humans which in turn spurns hierarchical power structures If everything is alive and essentially divine Blake's early work implies then everything is worthy of respect and capable of giving and receiving infinite delight Therefore one should imaginatively and joyfully immerse oneself in the community of other beings in which one is already enmeshed Often in the works discussed in this book Blake offers negative examples to suggest his moral philosophy he dramatizes the disastrous individual and social consequences of humans behaving as if God were a transcendent immaterial nonhuman demiurge and as if they were

separate from and ontologically superior to the degraded material universe that they see as composed of inert lifeless atoms William Blake as Natural Philosopher traces the evolution of eighteenth century debates over the vitalist qualities of life and the nature of the soul both in the United Kingdom and on the continent devoting significant attention to the natural philosophy of Newton Locke Berkeley Leibniz Buffon La Mettrie Hume Joseph Priestley Erasmus Darwin and many others
