literature and wish to understand and reflect upon wider perceptions of their profession **Different Drummer** Douglass Andrew Morrison, 2021-11-04 Andreas Gruentzig performed the first coronary artery balloon angioplasty in 1977 Shortly after that Doug completed his medical education and training and determined to contribute to the field Gruentzig's work had spawned In 1984 just as things were taking off Doug developed a cervical disc with neurologic impairment of his right arm That's when his neurosurgeons broke the bad news his interventional cardiology career was over Or was it Doug elected physical therapy including cervical traction rather than the proposed surgery The career disruption elicited a deep depression This prompted him to seek psychiatric care It also made him aware of the steep price many people in his field were paying for repeated exposures to life and death situations This created a dilemma akin to soldiers in battle including the associated problems of burnout depression substance abuse PTSD and suicide Over months the neurologic and psychologic symptoms improved Defying the experts' predictions he was able to resume an interventional cardiology career and follow in the footsteps of many cardiac interventional and surgical heroes As he describes in chapter 12 My high risk plasty career could not have occurred without two things the shared courage of many of my high risk patients and their families and the psychiatric care I received throughout much of my medical practice Doug's cardiology practice included thirty-one years of care for American veterans in four different university-affiliated Veterans Affairs VA hospitals The culmination of his academic and VA career was a five-year 1995-2000 sixteen-hospital VA Cooperative randomized clinical trial The Angina With Extremely Serious Operative Mortality Evaluation AWESOME trial and registry compared plasty with bypass surgery for high risk patients with acute coronary syndromes Doug followed his academic stint with fourteen years of private practice in rural America where he applied the AWESOME hypothesis in the real world Today coronary angioplasty with stents has become the standard emergency care for acute myocardial infarction and other medically refractory acute coronary syndromes This book recounts the role Doug played in the plasty revolution the price he paid for his success the debt he owes to many heroes and his hopes for the future for patients and care providers **Cultivating Regionalism** Kenneth H. Wheeler, 2011-11-01

In this ambitious book Kenneth Wheeler revises our understanding of the nineteenth-century American Midwest by reconsidering an institution that was pivotal in its making the small college During the antebellum decades Americans built a remarkable number of colleges in the Midwest that would help cultivate their regional identity Through higher education the values of people living north and west of the Ohio River formed the basis of a new Midwestern culture Cultivating Regionalism shows how college founders built robust institutions of higher learning in this socially and ethnically diverse milieu Contrary to conventional wisdom these colleges were much different than their counterparts in the East and South not derivative of them as many historians suggest Manual labor programs for instance nurtured a Midwestern zeal for connecting mind and body And the coeducation of men and women at these schools exploded gender norms throughout the region Students emerging from these colleges would ultimately shape the ethos of the Progressive era and in large numbers

take up scientific investigation as an expression of their egalitarian production oriented training More than a history of these antebellum schools this elegantly conceived work exposes the interplay in regionalism between thought and action who antebellum Midwesterners imagined they were and how they built their colleges in distinct ways
