Edward Janak, Denise F. Blum

Art Of Watching Films 8th Edition:

The Pedagogy of Pop Edward Janak, Denise F. Blum, 2013 Media competes with public schools in terms of student engagement and time. However, the two need not be mutually exclusive. The Pedagogy of Pop: Theoretical and Practical Strategies for Success discusses a variety of strategies and approaches for using social and mass media as tools through which teachers might improve schooling. While there is a vast body of literature in this field, editors Edward A. Janak and Denise Blum have created a text which differs in two substantive ways: scope and sequence. In terms of scope, this work is unique in two facets: first, it presents both theory and practice in one volume, bridging the two worlds; and second, it includes lessons from secondary and postsecondary classrooms, allowing teachers on all levels to learn from each other. In terms of sequence, The Pedagogy of Pop draws on lessons from both historical and contemporary practice. The introductory section of Janak and Blum's collection presents a pair of papers that use somewhat different approaches to examine the historical roots of contemporary critique. Part I presents a series of chapters designed to provide guidelines and theories through which educators on all levels can think about their practice, focusing more on the why of their approach than the how. Part II presents a more hands-on approach by sharing a variety of specific strategies for incorporating pop culture in all its forms: technology, music, television, video games, etc. in both secondary and postsecondary classrooms. The conclusion shows the praxis of teaching with popular culture, presenting a counterpoint to current thinking as well as a case study of the best of what can happen when popular culture is applied effectively.

Communication and Technology Lorenzo Cantoni, James A. Danowski, 2015-08-31 The primary goal of the Communication and Technology volume 5th within the series Handbooks of Communication Science is to provide the reader with a comprehensive compilation of key scholarly literature identifying theoretical issues, emerging concepts, current research, specialized methods, and directions for future investigations. The internet and web have become the backbone of many new communication technologies, often transforming older communication media through digitization to make them compatible with the net. Accordingly, this volume focuses on internet, web technologies. The essays cover various infrastructure technologies, ranging from different kinds of hard-wired elements to a range of wireless technologies such as WiFi, mobile telephony, and satellite technologies. Audio-visual communication is discussed with reference to large-format motion pictures, medium-sized television and video formats, and the small-screen mobile smartphone. There is also coverage of audio-only media such as radio music and voice telephony, text media in such venues as online newspapers, blogs, discussion forums, and mobile texting, and multi-media technologies such as games and virtual reality.

The Art of Watching Films Joseph M. Boggs, Dennis W. Petrie, 2000 This introduction to film appreciation uses examples from contemporary and popular American films to help students sharpen their powers of observation and establish habits of perceptive watching. The fifth edition adds 100 new photos and an expanded discussion of genre films and reintroduces the chapter
