Art Therapy, Research and Evidence-based Practice Andrea Gilroy, 2006-10-09 This is an

important and topical book coming at a time when there is growing pressure to show evidence of good practice in order to reassure the prospective client and to demonstrate financial accountability. It gives valuable guidelines and examples for art therapists. The book is innovative and inspiring and the author's enthusiasm shines through. I end with the last line of this topical, readable, relevant book: one that encapsulates its content. We need the facts, we need the figures, but we need the stories and the pictures too.

Therapy Today This book makes a major contribution to the field of art therapy by reviewing in an accessible and informed manner the issues around the development of research-informed practice. The author offers an overview of different traditions of inquiry that will be of value to practitioners as well as those actually involved in carrying out research.

John McLeod, Tayside Institute for Health Studies, University of Abertay Dundee

This impressive book is lively, inspiring, and innovative. Andrea Gilroy's energetic enthusiasm for her subject is infectious. She breathes life into the topics of research and EBP. This rich exploration combines a rigorous investigation of the existing literature with intelligent, original, and practical suggestions. A thorough, informative approach that challenges existing thinking. This is a must for art therapists at last: a book that places art at the centre of our evidence in a convincingly argued, accessible, and rewarding read.

Professor Joy Schaverien, PhD, Art Therapy around the world is under increasing pressure to become more evidence-based. As a result, practitioners now need to get to grips with what constitutes evidence, how to apply research in appropriate ways, and also how to contribute to the body of evidence through their own research and other related activities.

Written specifically for art therapy practitioners and students, **Art Therapy Research: Evidence-Based Practice** traces the background to EBP, critically reviews the existing art therapy research, explains the research process, links research with the development of clinical guidelines, and describes the knowledge and skills needed to demonstrate efficacy.

Drawing on her own experience as a researcher, practitioner, and lecturer, Andrea Gilroy looks at the implications of EBP for art therapy and examines common concerns about the threat it may pose to the future provision of art therapy within public services.

Art Therapy Research: Evidence-Based Practice addresses issues which are critical to the future development and even the survival of art therapy. Combining insightful analysis with practical guidance and examples, this is an ideal resource for practitioners and for those in training.

Andrea Gilroy is Reader in Art Psychotherapy at Goldsmiths, University of London.

Art Therapy in Australia Andrea J. Gilroy, Sheridan Linnell, Tarquam McKenna, Jill Westwood, 2019-01-28

Art Therapy in Australia: Taking a Postcolonial Aesthetic Turn explores and enacts established and emergent art therapy histories, narratives, and practices in the specific postcolonial context of contemporary Australia. It is the first published book to attempt to map this terrain. In doing so, the book aims to document important aspects of art therapy in Australia, including how Australian approaches both reiterate and challenge the dominant discourse of art therapy. This book is as much a performance as an account of the potential of art therapy to honour alterity, illuminate possibilities, and bear witness to the intrapsychic, relational, and social realms. The book offers a selective window into the rambling assemblage that is art therapy in the Great Southern Land. Contributors are Jan
