Oudsten,2016-12-05 Making exhibitions is a collaborative art producing is a multi layered unity of ideas and objects of invention and manifestation of content and form However there is an antagonistic dimension to it because content and form are traditionally represented by the entirely different realms of curator and designer Future successful developments in exhibition making are dependent on whether this gap of antagonism can be bridged space time narrative calls for a paradigmatic shift of focus It puts forward a unique approach breaking down traditional barriers and offering a wide ranging theoretical context redefining and expanding the parameters and the dynamics of the exhibition format in terms of an open narrative environment which at its roots displays deep similarities with performance on stage or installation in urban and rural space The book breaks new ground by looking at the exhibition as a cultural format firstly within a great sweep of the arts in general weaving a web of philosophical museological linguistic and media theoretical references which expands the contextual field of the profession It then offers unique and important insights from within in extreme close up by bringing together interviews with six of the leading exhibition designers who discuss the dynamics of the medium its interactive dimensions the soft parameters of the exhibition and how to get to grips with the format as a complex narrative space in which the public takes part Curator and designer should reposition themselves professionally at the heart of the axis which divides or connects content and form Performing Remains Rebecca Schneider,2011-03-01 At last the past has arrived Performing Remains is Rebecca Schneider s authoritative statement on a major topic of interest to the field of theatre and performance studies It extends and consolidates her pioneering contributions to the field through its interdisciplinary method vivid writing and stimulating polemic Performing Remains has been eagerly awaited and will be appreciated now and in the future for its rigorous investigations into the aesthetic and political potential of reenactments Tavia Nyong o Tisch School of the Arts New York University I have often wondered where the big important paradigm changing book about re enactment is Schneider s book seems to me to be that book Her work is challenging thoughtful and innovative and will set the agenda for study in a number of areas for the next decade Jerome de Groot University of Manchester Performing Remains is a dazzling new study exploring the role of the fake the false and the faux in contemporary performance Rebecca Schneider argues passionately that performance can be engaged as what remains rather than what disappears Across seven essays Schneider presents a forensic and unique examination of both contemporary and historical performance drawing on a variety of elucidating sources including the America plays of Linda Musmann and Suzan Lori Parks performances of Marina

Abramovic and Allison Smith and the continued popular appeal of Civil War reenactments Performing Remains questions the importance of representation throughout history and today while boldly reassessing the ritual value of failure to recapture the past and recreate the original [Moving Objects](#) Damon Taylor,2020-09-17 Moving Objects deals with emotive design designed objects that demand to be engaged with rather than simply used If postmodernism depended upon ironic distance and Critical Design is all about questions then emotive design runs hotter than this confronting how designers are using feelings in what they make Damon Taylor s original study considers these emotionally laden highly authored works often produced in limited editions and sold like art objects such as a chair made from cuddly toys a leather sofa that resembles a cow and a jewellery box fashioned from human hair Tracing the phenomenon back to the Dutch inflection that began with Droog designers like Jurgen Bey and Hella Jongerius Taylor conducts an analysis of the development of Design Art and looks for its origins in the uncanny explorations of surrealism Offering a critique of Speculative Design and an examination of the work of designers such as Mathias Bengtsson whose work involves growing furniture inside computers Taylor asks what happens when the tangible melts into the datascape and design becomes a question of mobilities In this way Moving Objects examines contemporary issues of how we live with artefacts and what design can do [Archival Materialities in a Digital Age](#) Eirini Goudarouli,Andrew Prescott,2025-02-27 Materiality looms large in the world of archives in storage conservation and shape or materials of the records How does this materiality change in the digital age The way digital techniques and materialities transform our engagement with archives is highlighted and explored throughout Archival Materialities in a Digital Age
