Towards a Psychology of Education Charlotte Mason, 2013-08-02 Towards a Philosophy of Education is Charlotte Mason's final book in her Homeschooling Series written after years of seeing her approach in action This volume gives the best overview of her philosophy and includes the final version of her 20 Principles This book is particularly directed to parents of older children about ages 12 and up but is a valuable overview for parents of younger children as well Part I develops and discusses her 20 principles Part II discusses the practical application of her theories Charlotte Mason was a late nineteenth century British educator whose ideas were far ahead of her time She believed that children are born persons worthy of respect rather than blank slates and that it was better to feed their growing minds with living literature and vital ideas and knowledge rather than dry facts and knowledge filtered and pre digested by the teacher Her method of education still used by some private schools and many homeschooling families is gentle and flexible especially with younger children and includes first hand exposure to great and noble ideas through books in each school subject conveying wonder and arousing curiosity and through reflection upon great art music and poetry nature observation as the primary means of early science teaching use of manipulatives and real life application to understand mathematical concepts and learning to reason rather than rote memorization and working endless sums and an emphasis on character and on cultivating and maintaining good personal habits Schooling is teacher directed not child led but school time should be short enough to allow students free time to play and to pursue their own worthy interests such as handicrafts Traditional Charlotte Mason schooling is firmly based on Christianity although the method is also used successfully by secular families and families of other religions

Democracy as Fetish Ralph Cintron, 2019-12-10 Democracy has long been fetishized Consequently how we speak about democracy and what we expect

from democratic governance are at odds with practice With unflinching resolve this book probes the theory of democracy and how the left and right are fascinated by it In this innovative multidisciplinary study Ralph Cintron provides sustained analysis of our political discourse He shows not only how the rhetoric of democracy produces strong desires for social order global wealth and justice but also how these desires cannot be satisfied Throughout his discussion Cintron includes ethnographic research from fieldwork conducted over the course of twenty years in the Latino neighborhoods of Chicago where he observes both citizens and the undocumented looking to democracy to fulfill their highest aspirations Politicians hand out favors to the elite developers strong arm aldermen and the disenfranchised have little redress The problem Cintron argues is that the conditions required to put democracy into practice territory a bordered nation state citizens property are constituted by inequality and violence because there is no inclusivity that does not also exclude Drawing on ethnography economics political theory and rhetorical analysis Cintron makes his case with tremendous analytic rigor This challenge to reassess the discourses on democracy and to consider democratic politics as always compromised by oligarchy will be of particular interest to political and rhetorical theorists
