Guidelines for Pressure Relief and Effluent Handling Systems CCPS (Center for Chemical Process Safety), 2010-08-31 Current industry government and public

emphasis on containment of hazardous materials makes it essential for each plant to reduce and control accidental releases to the atmosphere. Guidelines for Pressure Relief and Effluent Handling Systems meets the need for information on selecting and sizing pressure relief devices and effluent handling systems that will maintain process integrity and avoid discharge of potentially harmful materials to the atmosphere. With a CD ROM enclosed containing programs for calculating flow through relief devices, effluent handling systems and associated piping, the book offers an important collection of state of the art technology for safely relieving process equipment of such conditions as overpressure, overtemperature and/or runaway reactions. It provides information for two phase and compressible gas flow to select and size pressure relief devices, piping and effluent handling equipment such as gravity separators, cyclones, spargers and quench pools.
