What We Need Barrett Tillman, In early 2006 the Army chief of staff reported about 440 billion in expenditures A dollar bill is a smidgen over six inches long If 440 billion greenbacks are placed end to end they would extend 220 billion feet or 41 600 000 miles That is 1 664 times around the equator If the greenbacks had Andy Jackson's picture instead of George Washington's that line still would run well over 2 000 000 miles That is about four trips to the moon and back So then On 440 billion how is it possible that soldiers still lack sufficient body armor training facilities and ammunition and high tech bandages On 440 billion how is it possible that there is not enough money for vehicle maintenance and repair On 440 billion how is it possible that GIs still write home asking folks to send socks and sheets and batteries What We Need addresses The Great American Dichotomy we allocate vast sums for our military yet inevitably we spend most of that treasure on technical marvels that we do not use And if we do not use them we are entitled to ask how much we need them **1991 Top 10**

Almanac Michael W. Robbins, 1991 **Tom Clancy's Net Force: Cybernation** Tom Clancy, Steve Pieczenik, Steve Perry, 2001-11-01 In the year 2010 computers are the new superpowers Those who control them control the world To enforce the Net Laws Congress creates the ultimate computer security agency within the FBP the Net Force When web service is disrupted across the world a new nation makes its presence known Terrorists from a virtual country called CyberNation have taken the web hostage Their demands worldwide recognition and rights for their citizens Though there are millions of CyberNation sympathizers Net Force rallies its troops for an all out war on three fronts politically physically and electronically because dealing with terrorists is never an option **Spies, Lies, and Algorithms** Amy B. Zegart, 2023-02-28

A riveting account of espionage for the digital age from one of America's leading intelligence experts Spying has never been more ubiquitous or less understood The world is drowning in spy movies TV shows and novels but universities offer more courses on rock and roll than on the CIA and there are more congressional experts on powdered milk than espionage This crisis in intelligence education is distorting public opinion fueling conspiracy theories and hurting intelligence policy In Spies Lies and Algorithms Amy Zegart separates fact from fiction as she offers an engaging and enlightening account of the past present and future of American espionage as it faces a revolution driven by digital technology Drawing on decades of research and hundreds of interviews with intelligence officials Zegart provides a history of U S espionage from George Washington's Revolutionary War spies to today's spy satellites examines how fictional spies are influencing real officials gives an overview of intelligence basics and life inside America's intelligence agencies explains the deadly cognitive biases that can mislead analysts and explores the vexed issues of traitors covert action and congressional oversight Most of all

Zegart describes how technology is empowering new enemies and opportunities and creating powerful new players such as private citizens who are successfully tracking nuclear threats using little more than Google Earth And she shows why cyberspace is in many ways the ultimate cloak and dagger battleground where nefarious actors employ deception subterfuge and advanced technology for theft espionage and information warfare A fascinating and revealing account of espionage for the digital age Spies Lies and Algorithms is essential reading for anyone who wants to understand the reality of spying today
