Considering the Patient in Pediatric Drug Development Klaus Rose, 2020-11-19 Considering the Patient in Pediatric Drug Development How Good Intentions Turned into Harm addresses a fundamental challenge in drug development and healthcare for young patients In clinical trials and clinical practice the term children is used ambiguously to confer physiological characteristics to a chronological age limit which in reality does not exist This book outlines why the United States US and European Union's EU regulatory authorities pediatric academia and the pharmaceutical industry demand support and perform pediatric drug studies along with the key flaws of this demand that blurs the different administrative and physiological meanings of the term child In addition the book covers why most pediatric regulatory studies lack medical sense and many even harm young patients and the conflicts of interest behind pediatric drug studies It includes relevant information about the maturation of the human body regarding absorption distribution metabolism and excretion of food and drugs as well as key differences between newborns infants older children and adolescents Explains relevant information about the maturation of the human body regarding absorption distribution metabolism and excretion of food and drugs including key differences between newborns infants older children and adolescents Discusses historical roots of separate drug approval in officially labeled children and conflicts of interest in performing and publishing pediatric research Helps to decipher justifications for pediatric studies to help people navigate the relevance of the information The Morning Star and Free Baptist, 1901 *On the Voices, Contexts and Tasks of Theology: Experiments in Quaker and Feminist Thought* Rachel Muers, 2025-10-16 Who is Christian theology for what is it for

and what can it do Rachel Muers explores the voice of Christian theology the relationship between the subject of theology and theological discourse The book begins with the question how does someone speak of God understood not as a question about the criteria or authorised sources for theology but as a question of what is going on when theology is done How is it possible to speak as this particular historical embodied subject about God Muers investigates voice through engagement with historical and contemporary theologians particularly but not only with women who are speaking from relatively marginalised positions and contending with the lack of societal authorisation for their theological work Recognising that the question of voice is often equated in the contemporary context with the representation of identities and with how spaces and institutions can facilitate that representation the narrative considers more directly how questions of identity and context particularly in relation to gender shape the construction and representation of systematic theology and of theological tradition Muers examines the vocation of theology particularly in the contemporary Western academy and alongside other humanities subjects and a concluding chapter sets out a vision for ecumenical theological work The book draws extensively on the author's own Quaker tradition and on her experience of teaching and mentoring theologians

The Bible in American Poetic Culture Shira Wolosky, 2023-10-16 Although the Bible is the foundation of American poetic tradition there is no study of the Bible as an ongoing force in American poetry Not only a source of imagery allusion rhythm and style the Bible is central to how poetry has both shaped and been shaped by American civic political and social history including issues of ethnicity race and gender Through poetry core issues of the Bible in American culture emerge in a new light What defines America as a nation What are its historical political and religious meanings and direction Vitality how is it that the Bible is at once a shared common text binding community and yet was throughout American culture also contested disputed and politicized as a weapon of war This study begins with the Puritans and goes on to examine poetry of the Revolutionary and Civil Wars as well as claims and counterclaims in abolition slavery and women's rights In doing so it treats both popular and major writers including Edward Taylor Frances Harper Emerson Whitman Dickinson Moore and Gwendolyn Brooks concluding with Amanda Gorman
