Application Criticality Matrix:

Insider Computer Fraud Kenneth Brancik, 2007-12-06 An organization's employees are often more intimate with its computer system than anyone else. Many also have access to sensitive information regarding the company and its customers. This makes employees prime candidates for sabotaging a system if they become disgruntled or for selling privileged information if they become greedy. *Insider Computer Standards and Standardization: Concepts, Methodologies, Tools, and Applications* Management Association, Information Resources, 2015-02-28 Effective communication requires a common language a truth that applies to science and mathematics as much as it does to culture and conversation. *Standards and Standardization Concepts Methodologies Tools and Applications* addresses the necessity of a common system of measurement in all technical communications and endeavors in addition to the need for common rules and guidelines for regulating such enterprises.
