

Sentry HPS

Quality power supply

Sentry HPS is an On-Line double conversion (VFI) UPS with filtered and stabilized sinusoidal output voltage. Sentry HPS is immune to the interferences on the electric power supply line as it has special input and output filters.

Maximum reliability and power availability

The digital control of the appliance considerably improved reliability, since a reduction in electronic components lowers the likelihood of breakdowns. Digital control is provided by the microprocessor that, in the HPS series, controls all the internal parameters, thus increasing reliability and performance. In parallel connections, digital control ensures balance of the currents, which generally change over time due to phenomena such as vibrations and temperatures, between the UPS units and the exchange of information with no need for manual tuning. Sentry HPS has been designed so that it can be connected in parallel even after the installation of the first unit. The power availability can be increased thanks to various configurations available such as the parallel configuration, the Dual Bus function and the Dynamic Dual Bus system.
