Ethics - Scientific Research, Ethical Issues, Artificial Intelligence and Education Miroslav Radenkovic, 2023-08-02 Research is essential to the advancement of science and it must have both ethical and scientific value. In scientific investigations, there are various ethical problems to take into account, like informed consent, patient privacy, patient diversity, conflicts of interest, etc. The book is divided into four sections: Ethics in Scientific Research and Specific Ethical Issues, Ethics in Scientific Research and Artificial Intelligence, Ethics in Scientific Research and Education, and Ethics in Scientific Research and Public Awareness. Moreover, the chapters cover subjects like animal research ethics and ethical concerns in higher education. We are certain that clinicians, researchers, and students will find this volume to be helpful. The Scientific Method J. Scott Armstrong, Kesten C. Green, 2022-06-30 The scientific method delivers prosperity, yet scientific practice has become subject to corrupting influences from within and without the scientific community. This essential reference is intended to help remedy those threats. The authors identify eight essential criteria for the practice of science and provide checklists to help avoid costly failures in scientific practice. Not only for scientists, this book is for all stakeholders of the broad enterprise of science. Science administrators, research funders, journal editors, and policymakers alike will find practical guidance on how they can encourage scientific research that produces useful discoveries. Journalists, commentators, and lawyers can turn to this text for help with assessing the validity and usefulness of scientific claims. The book provides practical guidance and makes important recommendations for reforms in science policy and science administration. The message of the book is complemented by Nobel Laureate Vernon L. Smith's foreword and an afterword by Terence Kealey. *Intersection of Artificial Intelligence, Data Science, and Cutting-Edge Technologies: From Concepts to Applications in Smart Environment* Yousef Farhaoui, Tutut Herawan, Agbotiname Lucky Imoize, Ahmad El Allaoui, 2025-05-02 This book explores the integration of AI, data science, and emerging technologies to create innovative practical solutions for smart environments.
