Apuntes Castillas Classic Reprint Spanish:

Myth and Archive Roberto González Echevarría, 1998 Discusses the theory of the origin and evolution of the Latin American narrative and the emergence of the modern novel

Minding Animals in the Old and New Worlds Steven Wagschal, 2018-10-16 *Minding Animals in the Old and New Worlds* employs current research in cognitive science and the philosophy of animal cognition to explore how humans have understood non human animals in the Iberian world from the Middle Ages through the early modern period Using texts from European and Indigenously informed sources Steven Wagschal argues that people tend to conceptualize the minds of animals in ways that reflect their own uses for the animal the manner in which they interact with the animal and the place in which the animal lives Often this has little if anything to do with the actual cognitive abilities of the animal However occasionally early authors made surprisingly accurate assumptions about the thoughts and feelings of animals Wagschal explores a number of ways in which culture and human cognition interact including the utility of anthropomorphism the symbolic use of animals in medieval Christian texts attempts at understanding the minds of animals in Spain s early modern farming and hunting books the effect of novelty on animal conceptualizations in New World histories and how Cervantes navigated the forms of anthropomorphism that preceded him to create the first embodied animal minds in fiction

Apogee of Empire Stanley J. Stein, Barbara H. Stein, 2003-11-04 Once Europe s supreme maritime power Spain by the mid eighteenth century was facing fierce competition from England and France England in particular had successfully mustered the financial resources necessary to confront its Atlantic rivals by mobilizing both aristocracy and merchant bourgeoisie in support of its imperial ambitions Spain meanwhile remained overly dependent on the profits of its New World silver mines to finance both metropolitan and colonial imperatives and England s naval superiority constantly threatened the vital flow of specie When Charles III ascended the Spanish throne in 1759 then after a quarter century as ruler of the Kingdom of the Two Sicilies Spain and its colonial empire were seriously imperiled Two hundred years of Hapsburg rule followed by a half century of ineffectual Bourbon reforms had done little to modernize Spain s increasingly antiquated political social economic and intellectual institutions Charles III recognizing the pressing need to renovate these institutions set his Italian staff notably the Marqu s de Esquilache who became Secretary of the Consejo de Hacienda the Exchequer to this formidable task In *Apogee of Empire* Stanley J Stein and Barbara H Stein trace the attempt initially under Esquilache s direction to reform the Spanish establishment and later to modify and modernize the relationship between the metropole and its colonies Within Spain Charles and his architects of reform had to be mindful of determining what adjustments could be made that would help Spain confront its enemies without also radically altering the Hapsburg inheritance As described in impressive detail by the authors the bitter seven year conflict that ensued between reformers and traditionalists ended in a coup in 1766 that forced Charles to send Esquilache back to Italy After this setback at home Charles still hoped to effect constructive change in Spain s imperial system primarily through the

incremental implementation of a policy of comercio libre free trade These reforms made half heartedly at best failed as well and by 1789 Spain would find itself ill prepared for the coming decades of upheaval in Europe and America An in depth study of incremental response by an old imperial order to challenges at home and abroad Apogee of Empire is also a sweeping account of the personalities places and policies that helped to shape the modern Atlantic world Kendall W Brown **The Athenaeum** James Silk Buckingham, John Sterling, Frederick Denison Maurice, Henry Stebbing, Charles Wentworth Dilke, Thomas Kibble Hervey, William Hepworth Dixon, Norman Maccoll, Vernon Horace Rendall, John Middleton Murry, 1896 *The Athenaeum*, 1901 **Guide to Microforms in Print**, 1991 **Universities and Science in the Early Modern Period** Mordechai Feingold, Victor Navarro-Brotons, 2006-01-09 This book includes most of the contributions presented at a conference on Universities and Science in the Early Modern Period held in 1999 in Valencia Spain The conference was part of the Five Centuries of the Life of the University of Valencia Cinc Segles celebrations and from the outset we had the generous support of the Patronato Foundation overseeing the events In recent decades as a result of a renewed attention to the institutional political social and cultural context of scientific activity we have witnessed a reappraisal of the role of the universities in the construction and development of early modern science In essence the following conclusions have been reached 1 the attitudes regarding scientific progress or novelty differed from country to country and follow different trajectories in the course of the early modern period 2 institutions of higher learning were the main centers of education for most scientists 3 although the universities were sometimes slow to assimilate new scientific knowledge when they did so it helped not only to remove the suspicion that the new science was intellectually subversive but also to make science a respectable and even prestigious activity 4 the universities gave the scientific movement considerable material support in the form of research facilities such as anatomical theaters botanical gardens and expensive instruments 5 the universities provided professional employment and a means of support to many scientists and 6 although the relations among the universities and the academies or scientific societies were sometimes antagonistic the two types of institutions often worked together in harmony performing complementary rather than competing functions moreover individuals moved from one institution to another as did knowledge methods and scientific practices *Catalogue of the Library* Hispanic Society of America. Library, 1962 **A Catalogue of the Greenlee Collection, the Newberry Library, Chicago** Newberry Library, 1970 *Twentieth-century Spanish Fiction Writers* Martha Eulalia Altisent, Cristina Martínez-Carazo, 2006 Essays on a variety of Spanish authors who shaped the development of Spanish fiction in the twentieth century Entries focus on the interconnections between life and writing and trace the writers personal response to the cultural intellectual and political concerns of the day as well as to the traditions and literary styles that shaped their imagination Provides a condensed assessment of the authors aesthetic and personal preferences as shown through their writings
