

Building a Pedigree Activity

A pedigree is a diagram that shows how organisms are related and also traces the occurrence of a particular trait or characteristic for several generations. The genetic makeup of individuals in the pedigree might be determined if one understands the laws of heredity and probability.

Observe the symbols and the example of the pedigree below:

Male without trait		Male with trait	
Female without trait		Female with trait	
		Identical twins	

Pedigree showing blue-eyed trait:

- Generation I represents the parents
- Generation II represents the parent's children and a son-in-law
- Generation III represents the male grandchild
- Colored-in symbols have the genotype bb (blue eyes) ✓
- Non colored-in symbols have at least one B allele (brown eyes)
- The second allele of the brown-eyed people in the pedigree might be able to be determined from their parents or children
