Building Chicago Suburban Developers And The Creation Of A Divided Metropolis:

Building Chicago Ann Durkin Keating, 1988 Chicago's rapid growth in the mid nineteenth century was countered by cholera outbreaks swampy roads and poor living conditions This title offers an account of the birth and growth of Chicago's suburbs the governments that developed to service them and the ideas that guided early urban development *The Making of Urban America* Raymond A. Mohl, Roger Biles, 2023-10-03 The revised and updated third edition of *The Making of Urban America* includes seven new articles and a richly detailed historiographical essay that discusses the vast urban history literature added to the canon since the publication of the second edition The authors extensively revised introductions and the fifteen reprinted articles trace urban development from the preindustrial city to the twentieth century city With emphasis on the social economic political commercial and cultural aspects of urban history these essays illustrate the growth and change that created modern day urban life Dynamic topics such as technology immigration and ethnicity suburbanization sunbelt cities urban political history and planning and housing are examined *The Making of Urban America* is the only reader available that covers all of U S urban history and that also includes the most recent interpretive scholarship on the subject

Suburban Alchemy Nicholas Dagen Bloom, 2001 In *Suburban Alchemy* 1960s New Towns and the Transformation of the American Dream Nicholas Dagen Bloom examines the new town movement of the 1960s which sought to transform the physical and social environments of American suburbs by showing that idealism could be profitable Bloom offers case studies of three of the movement's more famous examples Reston Virginia Columbia Maryland and Irvine California to flesh out his historical account In each case innovative planners mixed land uses and housing types refined architectural graphic and landscape design offered well defined village and town centers and pioneered institutional planning As Bloom demonstrates these efforts did not uniformly succeed and attempts to reshape community life through design notably faltered However despite frequent disappointments and compromises the residents have kept the new town ideals alive for over four decades and produced a vital form of suburban community that is far more complicated and interesting than the early vision promoted by the town planners Lively chapters illustrate efforts in local politics civic spirit social and racial integration feminist innovations and cultural sponsorship *Suburban Alchemy* should be of interest to scholars of U S urban history planning history and community development as well as the general reader interested in the development of alternative communities in the United States

The Next Hundred Million Joel Kotkin, 2010-02-04 Visionary social thinker Joel Kotkin looks ahead to America in 2050 revealing how the addition of one hundred million Americans by midcentury will transform how we all live work and prosper In stark contrast to the rest of the world's advanced nations the United States is growing at a record rate and according to census projections will be home to four hundred million Americans by 2050 This projected rise in population is the strongest indicator of our long term economic strength Joel Kotkin believes and will make us more diverse and more competitive than any nation on earth Drawing on prodigious research firsthand reportage and

historical analysis The Next Hundred Million reveals how this unprecedented growth will take physical shape and change the face of America The majority of the additional hundred million Americans will find their homes in suburbia though the suburbs of tomorrow will not resemble the Levittowns of the 1950s or the sprawling exurbs of the late twentieth century The suburbs of the twenty first century will be less reliant on major cities for jobs and other amenities and as a result more energy efficient Suburbs will also be the melting pots of the future as more and more immigrants opt for dispersed living over crowded inner cities and the majority in the United States becomes nonwhite by 2050 In coming decades urbanites will flock in far greater numbers to affordable vast and autoreliant metropolitan areas such as Houston Phoenix and Las Vegas than to glamorous but expensive industrial cities such as New York and Chicago Kotkin also foresees that the twenty first century will be marked by a resurgence of the American heartland far less isolated in the digital era and a crucial source of renewable fuels and real estate for a growing population But in both big cities and small towns across the country we will see what Kotkin calls the new localism a greater emphasis on family ties and local community enabled by online networks and the increasing numbers of Americans working from home The Next Hundred Million provides a vivid snapshot of America in 2050 by focusing not on power brokers policy disputes or abstract trends but rather on the evolution of the more intimate units of American society families towns neighborhoods industries It is upon the success or failure of these communities Kotkin argues that the American future rests

From Cottage to Bungalow Joseph C. Bigott,2001-08-15 In this book Joseph C Bigott challenges many common assumptions about the origins of modern housing For example most studies of this period maintain that the prosperous middle class housing market produced innovations in housing and community design that filtered down to the lower ranks much later

Chicago's Historic Hyde Park Susan O'Connor Davis,2013-07-09

Stretching south from 47th Street to the Midway Plaisance and east from Washington Park to the lake s shore the historic neighborhood of Hyde Park Kenwood covers nearly two square miles of Chicago s south side At one time a wealthy township outside of the city this neighborhood has been home to Chicago s elite for more than one hundred and fifty years counting among its residents presidents and politicians scholars athletes and fiery religious leaders Known today for the grand mansions stately row houses and elegant apartments that these notables called home Hyde Park Kenwood is still one of Chicago s most prominent locales Physically shaped by the Columbian Exposition of 1893 and by the efforts of some of the greatest architects of the nineteenth and twentieth centuries including Daniel Burnham Frank Lloyd Wright Mies Van Der Rohe this area hosts some of the city s most spectacular architecture amid lush green space Tree lined streets give way to the impressive neogothic buildings that mark the campus of the University of Chicago and some of the Jazz Age s swankiest high rises offer spectacular views of the water and distant downtown skyline In Chicago s Historic Hyde Park Susan O Connor Davis offers readers a biography of this distinguished neighborhood from house to home and from architect to resident Along the way she weaves a fascinating tapestry describing Hyde Park Kenwood s most celebrated structures from

the time of Lincoln through the racial upheaval and destructive urban renewal of the 1940s 50s and 60s into the preservationist movement of the last thirty five years Coupled with hundreds of historical photographs drawings and current views Davis recounts the life stories of these gorgeous buildings and of the astounding talents that built them This is architectural history at its best Changing Suburbs Richard Harris,Peter Larkham,2003-09-02 The editors and contributors to this volume demonstrate how suburbs and the meaning of suburbanism change both with time and geographical location Here the disciplines of history geography and sociology together with subdisciplines as diverse as gender studies art history and urban morphology are brought together to reveal the nature of suburbia from the nineteenth century to the present day Hella Town Mitchell Schwarzer,2021-09-28 Oakland is a well kept secret a port city of dramatic topography and physical beauty varied social groups and one off neighborhoods In his incisive history Mitchell Schwarzer examines the development of Oakland s built environment from the onset of the twentieth century to the present especially in light of its status as a second city playing underdog to glamorous San Francisco across the bay His book emphasizes the ways transportation networks housing industry commerce and civic and park projects together shaped a social and political terrain that continues to be defined by class and racial inequalities **From SWEETBACK to SUPER FLY** Gerald R. Butters,2016-01-31 Racial politics and capitalism found a way to blend together in 1970s Chicago in the form of movie theaters targeted specifically toward African Americans In *From Sweetback to Super Fly* Gerald Butters examines the movie theaters in Chicago s Loop that became as he describes them black spaces during the early 1970s with theater managers making an effort to gear their showings toward the African American community by using black themed and blaxploitation films Butters covers the wide range of issues that influenced the theaters from changing racial patterns to the increasingly decrepit state of Chicago s inner city and the pressure on businesses and politicians alike to breathe life into the dying area Through his extensive research Butters provides an in depth look at this phenomenon delving into an area that has not previously been explored His close examination of how black themed films were marketed and how theaters showing these films tried to draw in crowds sheds light on race issues both from an industrial standpoint on the side of the theaters and movie producers as well as from a cultural standpoint on the side of the moviegoers and the city of Chicago as a whole Butters provides a wealth of information on a very interesting yet underexamined part of history making *From Sweetback to Super Fly* a supremely enjoyable and informative book *Planning as Persuasive Storytelling* James A. Throgmorton,1996-07 *Planning as Persuasive Storytelling* is a revealing look at the world of political conflict surrounding the Commonwealth Edison Company s ambitious nuclear power plant construction program in northern Illinois during the 1980s Examining the clash between the utility consumer groups community based groups the Illinois Commerce Commission and the City of Chicago Throgmorton argues that planning can best be thought of as a form of persuasive storytelling A planner s task is to write future oriented texts that employ language and figures of speech designed to construct constituencies that

the planner's vision is both desirable and feasible Though seeking to persuade the planner must also remain open to transformation through honest engagement with contending stories Juxtaposing stories about efforts to construct Chicago's electric future Planning as Persuasive Storytelling suggests a shift in how we think about planning In order to account for the fragmented and conflicted nature of contemporary American life and politics that shift would be away from science and the experts and toward persuasive storytelling by diverse authors P 4 of cover
