Reclaiming Reading Richard J. Meyer, Kathryn F. Whitmore, 2012-03-22 Inviting teachers back to the role of reflective advocates for thoughtful reading instruction this book presents theory and pedagogical possibilities to reclaim and build upon the knowledge base that was growing when government mandates scripted commercial programs and high stakes tests took over as the dominant agenda for reading instruction in U S public schools Focusing on literacy learners and their teachers lives as literate souls it examines how the teaching of reading can be reclaimed via an intensive reconsideration of five pillars as central to the teaching and learning of reading learning teaching curriculum language and sociocultural contexts Reclaiming Reading articulates the knowledge base that was marginalized or disrupted by legislated and policy intrusions into classrooms and provides practical examples for taking good reading instruction out of the cracks and moving it back to the center of the classroom Explaining what happens in readers minds as they read and how teachers can design practices to support that process this book encourages teachers to initiate pedagogy that will help them begin or return to the stance of reflective knowledgeable professional decision makers **Restorative Literacies** Deborah L. Wolter, 2021

Through eight compelling stories of restorative literacies Wolter explores the complex relationships among cognition metacognition identity behavior in schools and literacies Based on the principles of restorative justice restorative literacies are designed to help educators repair harm restore relationships and expand the concept of literacy for some of our most disenfranchised and disengaged students Restorative literacies are not just about growing readers and writers per se They are about creating a community of care that involves students teachers administrators and families so that all students experience racially culturally linguistically and economically responsive instruction in multiple forms of literacies Drawing on the author s rich experiences cultivating a love of reading among her students and studying the practices of other educators Restorative Literacies advances a provocative set of examples about centering the voice and stories of people in our quest to humanize and reimagine how we care for about and with others Book Features Presents a literacy model of restorative justice that includes participation from teachers principals administrators and parents Contains engaging narratives from elementary and secondary schools to illustrate concepts and strategies Explores compassionate listening as a conscious process of assuring that all involved are fully heard a skill that requires removing assumptions judgement and bias Identifies

practices that take a positive view of learners as opposed to referring students to special education Uses restoration as an alternative to pushout practices that are designed to control students and often prevent them from reaching their capacity Restorative Literacies offers a refreshing perspective on the power of story in cultivating emancipatory restorative and transformative contexts of learning teaching and development During these times of civil and civic unrest this is the book we need in education From the Foreword by H Richard Milner IV Cornelius Vanderbilt Chair of Education Vanderbilt University

Literature Circles Harvey Daniels, 1994 Two potent ideas independent reading and cooperative learning come together in this practical and exciting book This unique model of literature circles was developed by a team of midwest teachers who combined local inventions with models appearing in the national professional literature Daniels and his colleagues have been especially concerned with the issues of management the preparation of students and enacting the principles of classroom democracy

and group dynamics Their special contribution has been to add to literature circles the key formal elements of collaborative learning particularly through the varied roles used to guide students in newly formed groups The book presents a particularly effective way of getting started using temporary role sheets to create quick successful implementation of student led discussion groups Also offered are a variety of structures and procedures for managing literature circles over the long run strategies that solidify and deepen the contribution which this special activity can make to balance the curriculum across grade levels Drawing on stories from twenty two classroom teachers who work with students from kindergarten through college this book delivers ample guidance and inspiration for teachers who want to implement literature circles for themselves
