Applied Urban Ecology A Global Framework:

Applied Urban Ecology Matthias Richter, Ulrike Weiland, 2011-09-19 *Applied Urban Ecology A Global Framework* explores ways in which the environmental quality of urban areas can be improved starting with existing environmental conditions and their dynamics. Written by an internationally renowned selection of scientists and practitioners, the book covers a broad range of established and novel approaches to applied urban ecology. Approaches chosen for the book are placed in the context of issues such as climate change, green and open space development, flood risk assessment, threats to urban biodiversity, and increasing environmental pollution, especially in the megacities of newly industrialized countries. All topics covered were chosen because they are socially and socio-politically relevant today. Further topics covered include sustainable energy and budget management, urban water resource management, urban land management, and urban landscape planning and design. Throughout the book, concepts and methods are illustrated using case studies from around the world. A closing synopsis draws conclusions on how the findings of urban ecological research can be used in strategic urban management in the future. *Applied Urban Ecology A Global Framework* is an advanced textbook for students, researchers, and experienced practitioners in urban ecology and urban environmental research, planning, and practice.

Urban Ecology Philip James, Ian Douglas, 2014-10-30 *Urban Ecology An Introduction* seeks to open the reader's mind and eyes to the way in which nature permeates everyday urban living and how it has to be understood, cared for, and managed in order to make our towns and cities healthier places to visit and in which to live and work. The authors examine how nature can improve our physical and mental health, the air we breathe, and the waters we use, as well as boosting our enjoyment of parks and gardens. *Urban Ecology* sets out the science that underlies the changing natural scene and the tools used to ensure that cities become both capable of adapting to climate change and more beautiful and resilient. The book begins with a discussion of the nature of urban places and the role of nature in towns and cities. Part 1 looks at the context and content of urban ecology, its relationship to other foci of interest within ecology and other environmental sciences, and the character of city landscapes and ecosystems. In Part 2, the authors set out the physical and chemical components of urban ecosystems and ecological processes, including urban weather and climate, urban geomorphology and soils, urban hydrology, and urban biogeochemical cycles. In Part 3, urban habitats, urban flora and fauna, and the effects of deliberate and inadvertent human action on urban biota are examined. Part 4 contains an exploration of the identification and assessment of ecosystem services in urban areas, emphasising economic evaluation, the importance of urban nature for human health and well-being, and restoration ecology and creative conservation. Finally, in Part 5, the tasks for urban ecologists in optimising and sustaining urban ecosystems, providing for nature in cities, adapting to climate change, and in developing the urban future in a more sustainable manner are set out. Within the 16 chapters of the book, in which examples from around the world are drawn upon, the authors explore current practice and future alternatives, set out procedures for ecological assessment and evaluation, suggest student

activities and discussion topics provide recommended reading and an extensive bibliography The book contains more than 150 tables and over 150 photographs and diagrams *Urban Ecology* Richard T. T. Forman, 2014-02-13 The first richly illustrated worldwide portrayal of urban ecology tying together organisms built structures and the physical environment around cities

Urban Ecology Kimberly Etingoff, 2015-07-28 This title includes a number of Open Access chapters With increasing global urbanization the environments and ecologies of cities are often perceived to suffer While pollution and destruction of green space and species may occur cities also remain part of natural systems Cities provide natural processes necessary for survival for humans and ot

Understanding Urban Ecology Myrna H. P. Hall, Stephen B. Balogh, 2019-04-10 Over half of the world s population now lives in urban areas Few who live in cities understand that cities too are ecosystems as beholden to the laws and principles of ecology as are natural ecosystems Understanding Urban Ecology An Interdisciplinary Systems Approach introduces students at the college undergraduate level or those in advanced standing college credit high school courses to cities as ecosystems For graduate students it provides an overview and rich literature base Urban planners educators and decision makers can use this book to help in designing a more sustainable or green future The authors use a systems approach to explore the complexity and interactions of different components of a city s ecology with an emphasis on the energy and materials required to maintain such concentrated centers of human activity and consumption The book is written by seventeen specialized contributors and includes ten accompanying detailed field exercises to promote hands on experience observation and quantification of urban ecosystem structure and function The chapters describe one by one the different subsystems of the urban environment their individual components and functions and the interactions among them that create the social ecological environments in which we live The book s emphasis on social ecological metabolism provides students with the knowledge and methods needed to evaluate proposed policies for urban sustainability in terms of ecosystem capacity potential positive and negative feedbacks the laws of thermo dynamics and socio cultural perception and adaptability

Urban Ecology in the Global South Charlie M. Shackleton, Sarel S. Cilliers, Elandrie Davoren, Marié J. du Toit, 2021-04-20 Against the background of unprecedented rates of urbanisation in the Global South leading to massive social economic and environmental transformations this book engages with the dire need to understand the ecology of such settings as the foundation for fostering sustainable and resilient human settlements in contexts that are very different to the Global North It does so by bringing together scholars from around the world drawing together research and case studies from across the Global South to illustrate in an interdisciplinary and comprehensive fashion the ecology of towns and cities in the Global South Framed using a social ecological systems lens it provides the reader with an in depth analysis and understanding of the ecological dynamics and ecosystem services and disservices within the complex and rapidly changing towns and cities of the Global South a region with currently scarce representation in most of the urban ecology literature As such the book makes a call for greater geographical balance in urban ecology research

leading towards a more global understanding and frameworks The book embraces the complexity of these rapid transformations for ecological and environmental management and how the ecosystems and the benefits they provide shape local ecologies livelihood opportunities and human wellbeing and how such knowledge can be mobilised towards improved urban design and management and thus urban sustainability Reimagining Urban Planning in Africa Patrick Brandful Cobbinah, Eric Gaisie, 2023-12-21 This book analyses urban planning in Anglophone Francophone and Lusophone Africa exploring its history and advocating for new approaches In a climate changing world cities need to be reimagined and designed to be more sustainable But despite being one of the fastest urbanising continents Africa has generally weak urban planning systems The chapters adopt multi disciplinary and transdisciplinary approaches combining insights from urban studies and policy sciences emphasising existing gaps particularly in decision making planning practice and inclusiveness to offer an in depth analysis of urban planning in Africa The authors advocate for the reimagination of urban planning debating new institutionalism digital infrastructure climate urbanism gated communities and smart mobility The chapters provide both theoretical and practical contributions and advance thinking policymaking and implementation of sustainable urban planning approaches in Africa thus making the book indispensable for advanced students researchers and practitioners alike

Urban Ecosystems Jürgen Breuste, Stephan Pauleit, Dagmar Haase, Martin Sauerwein, 2021-09-29 This textbook on urban ecosystems answers important questions about the ecological structure functions and socio ecological development of cities worldwide Based on how cities are developing today in an increasingly urbanized world it explains ecological challenges for cities of the 21st century such as resource efficiency climate change moderation of quality of life and resilience The book combines theories of urban development and ecology with practical applications and case studies thus identifying potential for improvement and examples of good ecological urban development worldwide It shows that cities are by far not only problem areas but also offer great potential for a good life and that the various urban ecosystems can make a considerable contribution to this The eco city is thus not a utopia but a real goal that can be pursued step by step in a targeted manner taking into account the local and regional context Four renowned urban ecologists have contributed their specific experience in sub areas without losing sight of the big picture Jürgen Breuste is an urban ecologist and works at the Paris Lodron University in Salzburg Austria on the topics of sustainable urban development urban biodiversity ecosystem services and eco cities Dagmar Haase is Landschafts kologin and works at the Humboldt University of Berlin on urban ecosystem services and land use modeling Stephan Pauleit is a landscape planner and works at the Technical University of Munich on strategies for the sustainable development of urban landscapes Martin Sauerwein is a geographer and works at the University of Hildesheim on geo ecology in cultural landscapes geoarchaeology and soil protection The textbook addresses a broad audience of students teachers and also to practitioners in the fields of ecology urban ecology urban development sustainability urban geography nature and landscape conservation spatial planning landscape ecology social
