Building Evaluation For Adaptive Reuse And Preservation:

Building Evaluation for Adaptive Reuse and Preservation J. Stanley Rabun, Richard Miles Kelso, 2009-01-09 This book is designed for architects and engineers who need to evaluate existing buildings for a new use or for continuing a current use. It details each step of the evaluation process using an easy to follow and easy to implement approach that greatly reduces the possibility of unexpected costs and setbacks. Moreover, the book covers every part of the building itself from interior and exterior structures to systems and materials. Illustrations throughout the book will help you visualize and perform key procedures. In addition, the authors examine building evaluation issues for structures of different scales such as medium and small commercial structures and residential buildings. Most important, the authors help you assess the financial viability of a proposed adaptive reuse or preservation project, helping you and potential investors decide whether the proposed project offers a desired return on investment. Adaptive Reuse Richard L. Austin, David G. Woodcock, W. Cecil Steward, R. Alan Forrester, 1988 Old-House Journal, 2009-11 Old House Journal is the original magazine devoted to restoring and preserving old houses. For more than 35 years, our mission has been to help old house owners repair, restore, update, and decorate buildings of every age and architectural style. Each issue explores hands-on restoration techniques, practical architectural guidelines, historical overviews, and homeowner stories, all in a trusted, authoritative voice. *Cultural Landscape in Practice* Giuseppe Amoroso, Rossella Salerno, 2019-02-13 This book approaches cultural landscape as a driver for societal challenges: economic development, social inclusion, place assessment, and heritage conservation. It explores issues stemming from the relation between conservation and emergencies and identifies descriptive tools for conveying knowledge and generating new expertise: heritage skills, seismic culture, and social resilience. The documentation of landscapes, due in part to new technologies, increasingly involves integrated methodologies and graphic outcomes such as Heritage BIM, advanced 3D modeling, and immersive environments. According to recent UNESCO recommendations, the process of mapping places is a necessary prerequisite for design action and also includes the emotional and perceptive dimension, so as to represent space through visual thought and produce graphic materials. The chapters presented here will ultimately support efforts to overcome the emergency phase of reconstruction after natural disasters and, by exploring relevant issues in recent studies, will describe emerging tools that can help inspire practices that concern not only agrarian and urban but also historic urban landscapes. The work also presents planning tools to help preserve the integrity and authenticity of urban heritages. The book will benefit all scholars and practitioners who are involved in the process of understanding, designing, and transforming places and will foster an international exchange of research, case studies, and best practices to confront the practical challenges involved in keeping cultural landscapes alive.
