Building Networks And Partnerships Organizing For Sustainable Effectiveness By Philip Mirvis 2013 Hardcover:

Building Networks and Partnerships Philip H. Mirvis, Abraham B. (Rami) Shani, 2013-07-25 Organizing for Sustainable Effectiveness highlights research and practice aimed at understanding how organizations and more inclusive systems of actors develop a continuous unfaltering focus on sustainability

Business Strategies for Sustainability Helen Borland, Adam Lindgreen, Francois Maon, Véronique Ambrosini, Beatriz Palacios Florencio, Joelle Vanhamme, 2018-10-03 Business Strategies for Sustainability brings together important research contributions that demonstrate different approaches to business strategies for sustainability Many corporate initiatives toward what firms perceive to be sustainability are simply efficiency drives or competitive moves falling far short of actual strategies for ecological sustainability To suggest true ecological sustainability strategies this new research anthology adopts an interdisciplinary or transdisciplinary approach to discern what business strategies might look like if they were underpinned by environmental and ecological science The 23 chapters in this anthology reflect five main topic sections a delineating sustainability challenges and visions b contradiction integration and transformation of business and sustainability logics c innovating and developing strategic capabilities for sustainability d assessing and valuing sustainability and e toward multi level engagement and collaboration

How to Do Relevant Research Mirvis, Philip H., Albers Mohrman, Susan, Worley, Christopher G., 2021-10-22 Amidst rapid and fundamental shifts in the economic geo political technological and societal landscape this cutting edge book makes the timeless case that research can be informed by problems in the real world and make important contributions to theory and practice

Partnership and Leadership T. de Bruijn, Arnold Tukker, 2013-10-14 Sustainable development has become a central perspective in environmental strategies around the world It is clear that neither governments nor businesses have the capability to bring about sustainability on their own Therefore collaboration has emerged as a central concept At the same time it is obvious that someone has to take the lead in the development towards sustainability This book focuses on different forms of collaboration emerging between various actors The objective of the book is to more systematically explore the different roles and relationships between partnership and leadership Basically both partnership and leadership can be seen in a positive and negative way for example as far as partnership is concerned we can assume that the path towards sustainability can be paved by parties coming together taking some initiative collaborating On the opposite partnership and consensus based decisions can be seen as an obstacle to foster radical changes in production and consumption patterns Similarly leadership can be seen as an obstacle to sustainable development if leaders form close circles and are not willing to share experiences with other actors but leadership could also be considered as an important element to keep concepts and practices forward The book holds this double perspective explaining mapping and analyzing different goals formats methods of more and less collaborative approaches but at the same time taking a critical approach to the theme by understanding related risks effects prospects and corrective actions Next to a conceptual part the book brings together case studies from

around the world The focus is in describing and understanding various formats of collaboration and critically evaluating its effects and prospects A concluding chapter discusses the role of partnership and leadership in realizing various levels of environmental innovations optimization and re design that usually affect only a small part of the production consumption structure and much more complicated radical innovations that have to deal with societal sub systems The book is in part an edited version of selected papers presented during the 1998 Greening of Industry Conference in Rome on the subject enriched with contributions of other invited authors
