Building Protestant Left Christianity Crisis Magazine 1941 1993:

The Christian Century and the Rise of the Protestant Mainline Elesha J. Coffman, 2013-04-04 In *The Christian Century and the Rise of the Protestant Mainline* Elesha J. Coffman argues that liberal Protestants used cultural capital and persuasive rhetoric to make a strong case for their own status as shepherds of the American soul but their influence on American culture was ultimately more a social construct than a demographic reality The mainline was never mainstream and its alliance with genteel philosophy rather than popular culture led to both its early successes and its eventual crises

The Right of the Protestant Left M. Edwards, 2012-06-18 While serving as an introduction to ecumenical liberal Protestantism and the social gospel over the course of the twentieth century this book also highlights certain totalitarian as well as more fundamental conservative tendencies within those movements

Prophetic Encounters Dan McKanan, 2012-11-06 A broad definitive history of the profound relationship between religion and movements for social change in America The United States has always had an active vibrant and influential religious Left In every period of our history people of faith have envisioned a society of peace and justice and their tireless efforts have powered the social movements that have defined America's progress the abolition of slavery feminism the New Deal civil rights and others In this groundbreaking definitive work McKanan treats the histories of religion and of the Left as a single history showing that American radicalism is a continuous tradition rather than a collection of disparate movements Emphasizing the power of encounter between whites and former slaves between the middle classes and the immigrant masses and among activists themselves McKanan shows that the coming together of people of different perspectives and beliefs has been transformative for centuries uniting those whose faith is a source of activist commitment with those whose activism is a source of faith Offering a history of the diverse religious dimensions of radical movements from the American Revolution to the present day *Prophetic Encounters* invites contemporary activists to stand proudly in a tradition of prophetic power

Religion und Politik in den Vereinigten Staaten von Amerika Norbert Finzsch, Stefanie Coché, 2012

American Evangelicals and the 1960s Axel R. Schäfer, 2013-08-23 In the late 1970s the New Christian Right emerged as a formidable political force boldly announcing itself as a unified movement representing the views of a moral majority But that movement did not spring fully formed from its predecessors *American Evangelicals and the 1960s* refutes the thesis that evangelical politics were a purely inflammatory backlash against the cultural and political upheaval of the decade Bringing together fresh research and innovative interpretations this book demonstrates that evangelicals actually participated in broader American developments during the long 1960s that the evangelical constituency was more diverse than often noted and that the notion of right wing evangelical politics as a backlash was a later creation serving the interests of both Republican conservative alliances and their critics Evangelicalism's involvement with rather than its reaction against the main social movements public policy initiatives and cultural transformations of the 1960s proved significant in its 1970s political ascendance Twelve essays that range

thematically from the oil industry to prison ministry and from American counterculture to the Second Vatican Council depict modern evangelicalism both as a religious movement with its own internal dynamics and as one fully integrated into general American history

The Routledge History of Religion and Politics in the United States Since 1775 Cara Lea Burnidge, Lauren Frances Turek, 2024-12-30 Drawing together history and recent historiography this volume offers a reference work for understanding how religion influenced politics and how politics shaped religion in the United States from the American Revolution through to the present day The book brings together some of the most well regarded scholars in history religious studies American studies political science and other disciplines working in this field providing a groundbreaking transdisciplinary history of this topic It explores the major themes and historiographical trends that animate current scholarship ensuring that readers come away with a thorough picture of the field how it has evolved and where future scholars might take us This unique approach is well suited to students and scholars of both U S history and religious studies and encourages interdisciplinary analysis for the fields of religion and politics

Minorities and Reconstructive Coalitions Willie Gin, 2017-07-06 Through comparative and historical analysis the book shows that reconstructive coalitions such as labor and pan Christian moral movements affect minority incorporation and bring Catholics and Protestants together under new identities and significantly improving Catholic standing It provides overviews of the history of Catholics in Australia Canada and the United States while at the same time advancing unique arguments about the impact of coalitions on minority politics

Reinhold Niebuhr and Contemporary Politics Richard Harries, Stephen Platten, 2010-03-25 A timely collaborative re evaluation of Reinhold Niebuhr s work that reflects on his notable contribution to Christian social ethics the Christian doctrine of humanity and the engagement of Christian thought with contemporary politics

Faith and Foreign Affairs in the American Century Mark Thomas Edwards, 2019-08-22 The United States has led the world in almost every way since World War I In 1941 Life magazine publisher Henry Luce dubbed his country s preponderant power the American Century His editorial was a statement of fact but also an aspiration for countrymen to unite in promotion of a world order friendly to American interests Faith and Foreign Affairs in the American Century examines the nature of public involvement in American diplomacy As a concept decades in the making the American Century was conceived by those connected through the country s leading foreign policy think tank the Council on Foreign Relations The missionary couple and Washington insiders Francis and Helen Miller who fought to make the American empire a radically democratic one figured prominently in that work The Millers many partnerships embodied the conflicts as well as the cooperation of Christianity and secularism in the long reimagining of the United States as a global state Mark Thomas Edwards offers in this study a genealogy of the concept of the American Century Readers will encounter moments of Protestant Christian power and marginalization in the making of modern American foreign relations

The Theological Vision of Reinhold Niebuhr's "The Irony of American History" Scott R. Erwin, 2013-06-13 Reinhold Niebuhr remains at the center of a national conversation about Americas role in

the world and commentators with divergent political and religious positions look to his 1952 work *The Irony of American History* in support of their views In this study Scott R Erwin argues that an appreciation of Niebuhrs theological vision is necessary for understanding the full measure of Irony and his perspective on life more broadly Such a study is important because many individuals reading Irony today fail to acknowledge the central role that his Christian beliefs played in his writings Niebuhr described his theological vision as being in the battle and above it and it was this perspective that led Niebuhr in Irony to assert that America must both take morally hazardous action in combating the aggression of the Soviet Union and engage in critical self evaluation to prevent the country from assuming the most odious traits of its Cold War foe Niebuhr developed his theological vision over the course of the 1930s and 1940s through engagement with Christian doctrine as most readily seen in his academic works such as *The Nature and Destiny of Man* and with current events as seen in his many journalistic writings during this period By focusing primarily on Niebuhrs writings between 1931 and 1952 Erwin traces the development of his Christian interpretation of human nature and history establishes how it informed his theological vision and reveals how that theological vision underlies his writings on current affairs
