

CUSTOMER SERVICE OPERATIONS With normal use, your printer should operate properly for an extended period without requiring any service. The following service operations are described because they might eventually be required and we want you to know how to perform them correctly if they should become necessary.

Any additional maintenance or repairs to the printer will require laboratory equipment and special components. Refer to the enclosed Warranty card for details.

SELF TEST A SELF-TEST mode has been built into your Alphacom 32 Printer to provide a simple operational check. When placed in this mode the printer repeatedly prints a line of the numeral "8" and a line of the numeral "1". The test mode is entered by pressing the OFF button once while holding the ON/ADVANCE button down then releasing the ON/ADVANCE button. To stop SELF-TEST, press the OFF button. To reset printer into printing mode press ON/ADVANCE button.

PAPER JAM Under normal operation there should be no problem with paper jamming in the mechanism. In the event that small roll-ends of paper are removed or reinstalled in the printer, care should be taken that the tightly curled paper does not wrap under the paper stripper bar during the loading operation. If this occurs, the paper may begin to wrap around the platen, until a thick roll of paper builds up between the pressure plate and the platen, thereby stalling the printer. This is a difficult situation to remedy, since the platen will not rotate backwards. It is best avoided by careful loading practices.

If a paper jam does occur, disconnect the power to the printer and try the following technique to clear the jam.

1. Tear off and remove the paper roll from the paper compartment. Slice the paper layer by layer with a very sharp knife and pull paper out. **Do not** cut the platen.

CAUTION: Never use or place tools between the thermal heads and the platen. The probability of damage to the heads is very high under these circumstances.

2. The best cure for paper jamming, naturally, is PREVENTION—by careful loading of the printer, and checking for correct paper feeding at the start of printing, most jamming situations can be avoided.

WARRANTY For service under warranty, the printer must be returned to an authorized Alphacom Service Center. Contact the Service Center **BEFORE** returning the printer or power adaptor for service. See the enclosed Warranty card for additional information.
