Ashray Manual:

Manual of Hypertension BA Muruganathan, 2020-11-30 Hypertension is another name for high blood pressure. It can lead to severe complications and increases the risk of heart disease, stroke, and death. Blood pressure is the force exerted by the blood against the walls of the blood vessels. The new edition of this manual provides cardiologists with the latest advances in the diagnosis and management of hypertension. Divided into 14 sections, the book begins with an overview of the history and epidemiology of the condition, risk factors, pathophysiological aspects, and molecular basis. The next chapters discuss the accuracy of blood pressure measurements, target organ damage, and secondary hypertension. The book concludes with chapters on therapeutic aspects, genetics, and the latest treatment guidelines and meta-analysis. The second edition has been fully revised and includes new topics in line with recent advances in the field. Clinical images and figures further enhance the comprehensive text. Key points: Comprehensive guide to diagnosis and management of hypertension. Fully revised second edition featuring new topics in line with recent advances and guidelines. Highly illustrated with clinical images and figures. Previous edition 9789352500307 published in 2016. **Mergent International Manual**, 2009. Communication Technology and Human Development Avik Ghosh, 2006-02-13 This book explores the role of communication in development using the framework of communication designed for behaviour change. The author emphasizes the role of communication in advocacy, social mobilisation, training, research, and programme support. The first section provides a historical perspective on communication and development, outlining how communication has evolved from a system of delivering messages to one consciously designed to elicit the participation of the people in development initiatives. Section two presents case studies from the Indian perspective which provides an analytical look at new approaches in the fields of elementary education and adult literacy, rural development, and primary health care. The concluding section recommends a research-based professional approach to communication for behaviour change and suggests various crucial
