Aspekten Van Woordvolgorde In Het Nederlands:

Aspecten van de woordvolgorde in het Nederlands Pierre Godin, 1980 Peeters 1980 *Papers from the Fourth International Conference on Historical Linguistics, Stanford, March 26-30 1979* Elizabeth Closs Traugott, Rebecca Labrum, Susan C. Shepherd, 1980-01-01 The studies in this volume are revised versions of a selection from the papers presented at the Fourth International Conference on Historical Linguistics held at Stanford University on 26-30 March 1979. Papers at this conference and in this volume treat aspects of all current topics in historical linguistics including topics that are only recently considered relevant such as acquisition structure and language use **Transitivity** Teun Hoekstra, 2021-03-22 No detailed description available for Transitivity *Syntactic Change in Germanic* Kate Burridge, 1993-01-01 This study examines certain features of Dutch syntax between approximately 1300 and 1650. Of central importance are the overall developments in the word order patterning and the various changes they entail elsewhere in the grammar such as in the negative construction. After an introductory chapter providing goals and background for the study, the quantitative analysis of the data is presented in Chapter 2. Considerable attention is paid to contextual considerations and the pragmatic aspect of word order. Chapter 3 deals specifically with the question of exbraciation. Chapter 4 returns to the functional aspect of word order and discusses the importance of the notion topic. Chapter 5 provides a detailed analysis of the development of negation supported by comparative data from related Germanic languages and in a wider context of overall typological change. The concluding chapter discusses possible explanations of the findings. Two Appendices are added to the book: one providing a sketch grammar of Dutch, the other an annotated list of the corpus used. This study is purposefully eclectic in its approach, drawing upon many different traditions and areas in linguistics. This multifaceted approach is a major strength of the book, which moreover makes an important contribution to theoretical issues by presenting a vast descriptive data base for Dutch **Linguistic Studies offered to Berthe Siertsema**, 2022-07-04 **Case, Semantic Roles, and Grammatical Relations** Petra Campe, 1994-01-01 This is the first of a series of 6 books dealing with case phenomena in different languages, both Indo and non Indo European, resulting from work by a team of 20 specialists at the University of Leuven. It is the first time such a large scale investigation into case has been undertaken, and a remarkable feature of the project is the use of computer corpora of authentic material. This bibliography presents the many dimensions involved in research into case and case-related phenomena. This includes not only morphological case markers but also the crossconstituent semantic and grammatical relations expressed by morphological case or by its various counterparts: morpho-syntactic processes such as transitivity and passivization, and pragmatic and textual considerations. In addition, the bibliography reflects the implications of case research for other disciplines such as foreign language teaching and artificial intelligence. More than 6000 publications are listed. An extensive Subject Index provides easy access to all the topics and major concepts covered. A Language Index and a Guide to Languages and Language Families conclude the book. The other

volumes in the series include The Dative 2 vols The Genitive The Nominative and Accusative and Non nuclear Cases

Linguistics in the Netherlands 1977-1979 Wim Zonneveld, Fred Weerman, 2019-11-18 No detailed description available for Linguistics in the Netherlands 1977 1979 *Een scone leeringe om salich te sterven* B. de Geus, J. van der Heiden, A. Maat, D. den Ouden, 1985-01-01 **Problems in Syntax** Liliane Tasmowski, Dominique Willems, 2012-12-06 **Arguments and Structure** Teun Hoekstra, 2008-08-22 This book contains 14 articles by Teun Hoekstra 1953 1998 on core issues in syntactic theory Some articles focus on the structure of DP others on the structure of the sentence as a whole while others still deal explicitly with the parallels between the two The papers are distributed over four sections Argument structure T chains The morpho syntax of verbal and nominal projections and Small clauses More than half of the articles in this book are published here for the first time or appear for the first time in English Hoekstra's work is characterized by a fundamental interest in the central questions of syntactic theory most notably the relation between argument structure and X bar structure This concentrated interest led to a deep understanding of the notion of transitivity with respect to both the status of the external argument and that of the internal argument where status refers to both the content and the licensing In this collection of papers Hoekstra reports on his insights in these matters As far as content and licensing of the external argument is concerned this collection contains papers on the relation between passives and their active counterparts the parallels between possessives and transitives and the differences and similarities between past participles and infinitives As to the internal argument we find papers addressing sentential complementation verbal affixation and resultatives And there is a whole section on tense and its role in keeping the sentence together One of the papers in this collection is Hoekstra's classic but hitherto unpublished Small clauses everywhere more than 70 pages which summarizes Hoekstra's views on such issues as resultatives particle verbs and double object constructions
