Assisted Reproductive Technology Accomplishments And New Horizons:

Assisted Reproductive Technology Christopher J. De Jonge, Christopher L. R. Barratt, 2002-07-11 This text describes the rapid advances that have revolutionized reproductive medicine due to the result of converging and overlapping developments in reproductive biology molecular biology and genetics

Battleground: Science and Technology Peter H. Denton, Sal Restivo, 2008-10-30 The modern world is filled with debate and controversy and science and technology the most characteristic features of the modern world are not immune Science and technology are implicated in many if not all of the issues troubles and problems students are likely to come across in their classes and in their everyday lives Science and technology serve as a primary pathway to understanding front page headlines on everything from war to AIDS and from oil exploration to global warming Battleground Science and Technology examines the most hot button issues involving science and technology and provides a balanced assessment of the arguments on all sides of the often strident debates The approximately 100 issues examined in Battleground Science and Technology include topics in the brain sciences including the controversies over the cause of autism and the reliability of memory as well as the debates over parapsychology debates surrounding information technology such as only privacy the impact of video games on social behavior and the advent of virtual reality the complexity over drugs and medications such as the testing of the efficacy of medications the war on recreational drugs and the costs of pharmaceutical research and hot button topics that are constantly in the news such as evolution and creationism DNA testing stem cell research and genetically modified organisms Each entry provides a list of accessible resources useful for further research

Kinship, Law and the Unexpected Marilyn Strathern, 2005-10-24 How can we hold in the same view both cultural or historical constructs and generalities about social existence Kinship Law and the Unexpected takes up an issue at the heart of studies of society the way we use relationships to uncover relationships Relationality is a phenomenon at once contingent on certain ways of knowing and ubiquitous to social life The role of relations in western Euro American knowledge practices from the scientific revolution onwards raises a question about the extent to which Euro American kinship is the kinship of a knowledge based society The argument takes the reader through current issues in biotechnology new family formations and legal interventions and intellectual property debates to matters of personhood and ownership afforded by material from Melanesia and elsewhere If we are often surprised by what our relatives do we may also be surprised by what relations tells us about the world we live in

Born and Made Sarah Franklin, Celia Roberts, 2006-10-30 Are new reproductive and genetic technologies racing ahead of a society that is unable to establish limits to their use Have the new genetics outpaced our ability to control their future applications This book examines the case of preimplantation genetic diagnosis PGD the procedure used to prevent serious genetic disease by embryo selection and the so called designer baby method Using detailed empirical evidence the authors show that far from being a runaway technology the regulation of PGD over the past fifteen years provides an example of precaution and

restraint as well as continual adaptation to changing social circumstances Through interviews media and policy analysis and participant observation at two PGD centers in the United Kingdom Born and Made provides an in depth sociological examination of the competing moral obligations that define the experience of PGD Among the many novel findings of this pathbreaking ethnography of reproductive biomedicine is the prominence of uncertainty and ambivalence among PGD patients and professionals a finding characteristic of the emerging biosociety in which scientific progress is inherently paradoxical and contradictory In contrast to much of the speculative futurology that defines this field Born and Made provides a timely and revealing case study of the on the ground decision making that shapes technological assistance to human heredity Women's Lives Claire A. Ettaugh, Judith S. Bridges, 2015-07-14 Women's Lives A Psychological Exploration 3rd Edition draws on a wealth of the literature to present a rich range of experiences and issues of relevance to girls and women This text offers the unique combination of a chronological approach to gender that is embedded within topical chapters Cutting edge and comprehensive each chapter integrates current material on women differing in age ethnicity social class nationality sexual orientation and ableness The third edition reflects substantial changes in the field while maintaining its empirical focus through engaging writing student activities and critical thinking exercises With over 2 100 new references emphasizing the latest research and theories the authors continue to pique interests in psychology of women

Principles and Practice of Fertility Preservation Jacques Donnez, S. Samuel Kim, 2011-02-03 The specialty of fertility preservation offers patients with cancer who are rendered infertile by chemo and radiotherapy the opportunity to realize their reproductive potential This gold standard publication defines the specialty The full range of techniques and scientific concepts is covered in detail and the author team includes many of the world's leading experts in the field The book opens with introductions to fertility preservation in both cancer and non cancer patients followed by cancer biology epidemiology and treatment and reproductive biology and cryobiology Subsequent sections cover fertility preservation strategies in males and females including medical surgical procedures ART cryopreservation and transplantation of both ovarian tissue and the whole ovary and in vitro follicle growth and maturation Concluding chapters address future technologies as well as ethical legal and religious issues Richly illustrated throughout this is a key resource for all clinicians specializing in reproductive medicine gynecology oncology hematology endocrinology and infertility How We Do It Robert Martin, 2013-06-11 A primatologist explores the mystery of the origins of human reproduction explaining that understanding the evolutionary past can provide insight into what worked what didn't and what it all means for the future of mankind **Decline and Prosper!** Vegard Skirbekk, 2022-04-01 Globally women are having half as many children as they had just fifty years ago Why have birth rates fallen and how will low fertility affect our shared future In Decline and Prosper demographic expert Vegard Skirbekk offers readers an accessible comprehensive and evidence based overview of human reproduction Readers learn about the evolution of childbearing across different populations and how fertility is related to changes in our reproductive capacity

contraception education religion partnering policies economics assisted reproduction and catastrophes Readers will explore the future of family size and its impact on human welfare women s empowerment and the environment Skirbekk argues that low fertility is on the whole a good thing while recognizing the challenges of population aging and coincidental childlessness A balanced integrative examination of one of the most important issues of our time Decline and Prosper drives home the fact that we must ultimately adapt to a world with fewer children The book will be invaluable to anyone who is interested in the far reaching effects of global fertility including researchers and students of demography social statistics medical sociologists family and childhood studies human geographers sociology of culture social and public policy *Beyond Therapy* President's Council on Bioethics (U.S.),2003 Essential IVF Jonathan van Blerkom,Linda Gregory,2011-06-28 There is no clearer testament to the importance and efficacy of in vitro fertilization in the treatmentof the infertilepatient than the fact that over one million babies have been born since its clinical introduction in 1978 The successof this worldwideendeavorhas evolvedto treat some of the formerly most intractable forms of infertility and requires individuals with different skills and insights whose activities are often compartmentalized into clinical laboratory and research functions The intent of Essential IVF is to present current issues in clinical IVF that encompass the varied activities of those engaged in this enterprise By integrating clinical basic research and laboratory related aspects of human reproduction readers with diverse interests should obtain a more complete understanding of the impact importance and inter relatedness of each in the progress of infertility treatment and an appreciation of whether emerging technologies will or should contribute to this progress in the near future The topics selected for this volume include research that has begun to explain the origins of differential follicular gamete embryo and uterine competence and specific laboratory procedures and protocols that may have important clinical implications forthe generation ofdevelopmentally viable embryos Human embryoresearchoverthe past 25 years has notonly confirmed that the developmental potential of each embryo is unique but more importantly demonstrated how genetic and nongenetic factors for sperm and oocyte determineembryo competencewell before fertilization Several chapters deal with the origins of normal and compromised gametes and how those with high competence can be identified and isolated for fertilization
