Technology and Consumption Ruby Roy Dholakia, 2012-05-16 Technology and Household Consumption is a comprehensive text that provides insights into technology's impact on consumer behavior and the household environment. Consumption and consumer behavior has become a very important subject of study that is now covered in many disciplines including family economics, culture studies, and feminist women studies. In the first section, this book provides a historical perspective on how consumer behaviors have changed because of technology and how technology itself has changed. Data on ownership and expenditures is detailed in describing the penetration of technology in the household and changes over time. In the examination of demographics and social changes, an emphasis is placed on women and children. As it is important to understand the entry paths and factors that influence them, the book also introduces a research framework to understanding the adoption and utilization of household technologies. In the second section, the book examines specific household technologies and consumption experiences including shopping choices and behaviors, entertainment outlets and availability, communications technologies, and working at home. The book concludes with a section on the relationships between marketers and consumers.

Location-Based Services in Cellular Networks: from GSM to 5G NR Adrián Cardalda García, Stefan Maier, Abhay Phillips, 2020-07-31 This exciting new book delivers a comprehensive overview of the cellular network architecture with focus on the positioning applications and emergency call services and covers aspects brought by 5G including the core virtualization and the network slicing to optimize cellular network deployments. Focus is given to the different positioning technologies used in cellular networks divided in satellite positioning, terrestrial radio positioning, non-RF positioning, and a brief introduction to sensor fusion and Bayesian theory. It provides an overview of all the positioning technologies used in cellular networks from GSM to 5G from RAT-independent technologies such as GNSS including GNSS evolution, RTK, and PPP, Wi-Fi, Bluetooth, and sensor fusion to cellular network native technologies such as OTDOA, DL-TDOA, ECID, multi-cell RTT, and the Angle of Arrival (AOA)-based techniques that take advantage of 5G mmWave beamforming features. Different positioning protocols, especially the LTE Positioning Protocol (LPP) which is used for LTE and 5G NR, and defines the communication between the user device (mobile phone, connected vehicle, etc.) and the base station are explained extensively and compares it with other competing protocols such as OMA LPPE. Furthermore, it also explains the core

network positioning protocols LPPa NRPPa that describe the communication between the location server and the core network Explanation of different signaling parameters will enable the reader to understand better how positioning works in a cellular network The contents of this book are aimed at all types of users from beginners to the concept of positioning to experts that are looking to enhance their knowledge of positioning in cellular networks Internet for Nursing Research Joyce J.
