Bakhtin In Contexts Bakhtin In Contexts:

Bakhtin in Contexts Amy Mandelker, 1995-11-22 The Russian critic M M Bakhtin has recently become a major figure in contemporary theory beyond his traditional influence in Slavic literary studies Bakhtin in Contexts explores the revolutionary impact Bakhtin's ideas have carried in contemporary discussion of language art culture and social science in recent years The contributors represent a broad range of disciplines in the humanities and social sciences epitomizing the views of Russian and American specialists in those fields Bakhtin often referred to as the human sciences The diversity of perspective and flexibility of approach make this a unique contribution to Bakhtin studies and to the ongoing dialogue between Western and Russian theorists *The Contexts of Bakhtin* Professor David Shepherd, David Shepherd, 2012-11-12 The fourteen

essays collected in this volume notwithstanding their diversity of subject matter and approach share a concern with the contexts to which we need to refer in order to understand not only the origins but also the potential of Mikhail Bakhtin's thought contexts both immediate and oblique personal and impersonal intellectual and theoretical Five of the essays are by well known Russian scholars whose work on Bakhtin has not previously been translated in English the other nine papers are by established and emerging Bakhtin specialists in North America the United Kingdom and Europe **Chaucer in context**

S. H. Rigby, 2020-01-03 Amongst the most written about works of English literature Chaucer's Canterbury Tales still defy categorization claims the author of this book Was Chaucer a poet of profound religious piety or a sceptic who questioned all religious and moral certainties Do his pilgrims reflect the society of the day or were they a product of an already well established literary tradition and convention Surveying and assessing competing critical approaches to Chaucer's work this text emphasizes a need to see Chaucer in historical context the context of the social and political concerns of his own day

The Art of Translation in Light of Bakhtin's Re-accentuation Slav Gratchev, Margarita Marinova, 2022-10-06

Although Mikhail Bakhtin's study of the novel does not focus in any systematic way on the role that translation plays in the processes of novelistic creation and dissemination when he does broach the topic he grants translation a disproportionately significant role in the emergence and constitution of literature The contributors to this volume from the US Hong Kong Finland Japan Spain Italy Bangladesh and Belgium bring their own polyphonic experiences with the theory and practice of translation to the discussion of Bakhtin's ideas about this topic in order to illuminate their relevance to translation studies today Broadly stated the essays examine the art of translation as an exercise in a cultural re-accentuation a transference of the original text and its characters to the novel soil of a different language and culture which inevitably leads to the proliferation of multivalent meanings and to explore the various re-accentuation devices employed over the span of the last 100 years in translating modern texts from one language to another Through its contributors *The Art of Translation in Light of Bakhtin's Re-accentuation* brings together different cultural contexts and disciplines such as literature literary theory the visual arts pedagogy translation studies and philosophy to demonstrate the continued international relevance of Bakhtin's ideas to the

study of creative practices broadly understood **Restoring the Human Context to Literary and Performance Studies**
Howard Mancing, Jennifer Marston William, 2022-01-28 Restoring the Human Context to Literary and Performance Studies argues that much of contemporary literary theory is still predicated at least implicitly on outdated linguistic and psychological models such as post structuralism psychoanalysis and behaviorism which significantly contradict current dominant scientific views By contrast this monograph promotes an alternative paradigm for literary studies namely Contextualism and in so doing highlights the similarities and differences among the sometimes conflicting contemporary cognitive approaches to literature and performance arguing not in favor of one over the other but for Contextualism as their common ground *Post-transcendental Communication* Colin B. Grant, 2008 Compared with other human and social sciences communication theory appears to be of recent origin Appearances deceive however for the antecedents of this growing field of work can be found in the classic philosophical treatises of western and non western thinkers including Plato Sextus Empiricus and Laozi reaching forward through the theolinguistic tradition of St Augustine Boethius Averro s and Ockham before arriving at the modern age Following Wittgenstein s linguistic turn and Husserl s phenomenology in the early decades of the twentieth century we arrive at the fertile plains of semiotics information theory pragmatics and dialogism out of which communication theory has grown And yet an unresolved and historically non coincidental tension remains between the implicit transcendental claims of much of communication theory and our experiences of risk uncertainty and dissolution in what Zygmunt Bauman has described as our liquid age As communication theory matures it is an opportune moment to reflect on what form a detranscendentalised theory of communication might take In bringing intentions understandings meanings and interactions down to earth this book invites its readers to account for the complex communications between communications actors and social processes without recourse to transcendental theories of understanding **Thinking Space** Mike Crang, Nigel Thrift, 2002-09-11 As theorists have begun using geographical concepts and metaphors to think about the complex and differentiated world it is important to reflect on their work and its impact on our thoughts on space This revealing book explores the work of a wide range of prolific social theorists Included contributions from an impressive range of renowned geographical writers each examine the work of one writer ranging from early this century to contemporary writers Among the writers discussed are Georg Simmel Mikhail Bakhtin Gilles Deleuze Helene Cixous Henri Lefebvre Jacques Lacan Pierre Bourdieu Michel Foucault and Franz Fanon Ideal for those interested in the spatial turn in social and cultural theory this fascinating book asks what role space plays in the work of such theorists what difference if any it makes to their concepts and what difference such an appreciation makes to the way we might think about space
Vocative Constructions in the Language of Shakespeare Beatrix Busse, 2006-01-01 This study investigates the functions meanings and varieties of forms of address in Shakespeare s dramatic work New categories of Shakespearean vocatives are developed and the grammar of vocatives is investigated in above and below the clause following morpho syntactic semantic

lexicographical pragmatic social and contextual criteria Going beyond the conventional paradigm of power and solidarity and with recourse to Shakespearean drama as both text and performance the study sees vocatives as foregrounded experiential interpersonal and textual markers Shakespeare's vocatives construe both quantitatively and qualitatively habitus and identity They illustrate relationships or messages They reflect Early Modern Shakespearean and intra or inter textual contexts Theoretically and methodologically the study is interdisciplinary It draws on approaches from historical pragmatics stylistics Hallidayean grammar corpus linguistics cognitive linguistics socio historical linguistics sociology and theatre semiotics This study contributes thus not only to Shakespeare studies but also to literary linguistics and literary criticism **English in**

China Emily Tsz Yan Fong, 2021-03-29 This volume explores Chinese identity through the lens of both the Chinese and English languages Until the twentieth century English was a language associated with capitalists and military aggressors in China However the massive progression of globalisation in China following the 1980s has transformed the language into an important tool for China's modernisation Regardless of the role English plays in China there has always been a fear there that the spread of culture's associated with English would lead to weakening of the Chinese identity This fear resulted in the development of the *ti yong* principle Chinese learning for essence *ti* Western learning for utility *yong* Fong's book aims to enhance understanding of the *ti yong* dichotomy in relation to people's sense of being Chinese in China the penetration of English into non English speaking societies the resultant tensions in people's sense of personal and national identity and their place in the world Using Q methodology the book presents observations based on data collected from four participant groups namely high school and university students teachers and parents in China to investigate their perspectives on the status and roles of English as well as those of Chinese Considering the growing international interest in China this volume will appeal to readers interested in China's contemporary society in general its language culture and identity It will be a useful resource for academics researchers and students in the field of applied linguistics language education and Chinese cultural studies and can also be adopted as a reference book for undergraduate courses relating to language identity and culture Mikhail Bakhtin's Heritage in Literature, Arts, and Psychology Slav N. Gratchev, Howard Mancing, 2020-07-07
