developed country is susceptible to attack by relatively innocuous means over time that no one would notice until it was too late In this novel Dave Blanchard a structural engineer is dealing with the first manifestations of such a plot on a structure that represents the dream project he has been working toward all his life and which is on the verge of completion That project is a megafloat in the form of a floating airport intended to replace Lindbergh Field in San Diego Dave s structure also represents the completion of an idea originated in 1914 by a visionary named Edward Armstrong Note In the real world floating airports have been proposed for several cities around the world including San Diego More than a decade ago the city of Tokyo actually built a smaller scale megafloat and tested it with twin engine aircraft The tests were successful In his struggle to discover the nature and the causes of the problem with his structure he sets off a series of confrontations with the perpetrators that force him to make choices between saving his dream project and saving his girl friend Nancy whom the evildoers have kidnapped The question is whether Dave can succeed in saving either or both through a series of traumatic episodes in which Dave is required to exercise the moral and physical courage to face the worst that desperate terrorists can throw at him
