Adapting To Teaching And Learning In Open Plan Schools:

Adapting to Teaching and Learning in Open-Plan Schools Vaughan Prain, Peter Cox, Craig Deed, Debra Edwards, Cathleen Farrelly, Mary Keeffe, Valerie Lovejoy, Lucy Mow, Peter Sellings, Bruce Waldrup, Zali Yager, 2014-11-26 In recent years many countries have built or renovated schools incorporating open plan design. These new spaces are advocated on the basis of claims that they promote fresh productive ways to teach and learn that address the needs of students in this century resulting in improved academic and well being outcomes. These new approaches include teachers planning and teaching in teams grouping students more flexibly developing more coherent and comprehensive curricula personalising student learning experiences and providing closer teacher student relationships. In this book we report on a three year study of six low SES Years 7-10 secondary schools in regional Victoria Australia where staff and students adapted to these new settings. In researching this transitional phase we focused on the practical reasoning of school leaders teachers and students in adapting organisational pedagogical and curricular structures to enable sustainable new learning environments. We report on approaches across the different schools to structural organisation of students in year level groupings distributed leadership teacher and pre service teacher professional learning student advocacy and wellbeing use of technology mediated learning personalising student learning experiences and curriculum design and enactment. We found that these new settings posed significant challenges for teachers and students and that successful adaptation depended on many interconnected factors. We draw out the implications for successful adaptation in other like settings.

Personalising Learning in Open-Plan Schools Vaughan Prain, Peter Cox, Craig Deed, Debra Edwards, Cathleen Farrelly, Mary Keeffe, Valerie Lovejoy, Lucy Mow, Peter Sellings, Bruce Waldrup, 2015-11-03 How can widely acknowledged challenges facing regional secondary schools with high concentrations of low SES students ineffectual curricula and poor levels of student engagement attendance and wellbeing be addressed? In this book we report on key outcomes of the Bendigo Education Plan that aimed to improve the academic attainment and wellbeing of 3000 regional secondary students. This Plan entailed rebuilding four Years 7-10 colleges and developing a differentiated and personalised curriculum with teachers team teaching in open plan settings. We analyse how and why teachers and students adapted to these new practices. We focus on both generic changes in the schools around the use of ICTs and the organisation of the curriculum and on specific approaches to teaching and learning in English mathematics science social studies and studio arts. This book provides research based guidelines on how the curriculum can be renewed and enacted effectively in these and like schools. In analysing a large scale attempt to address the challenge of making learning personalised and meaningful for this cohort of students our book addresses larger questions about quality secondary curriculum and successful teacher professional learning support.

School Space and its Occupation, 2018-09-06 *School Space and its Occupation* addresses the ongoing and pressing need for justification of education and environmental innovation. Further the increasingly important work of evaluating the new learning spaces brings attention to the need for

conceptual and methodological clarity The editors have assembled a collection of leading authors to explore the links between education and design progression of ideas in education and architecture as well as making sense of pedagogical trends and spatial and design relevance Post occupancy evaluation is capable of informing both educational and architectural questions to generate sustainable adaptations for educators and designers Part 2 focuses on the occupancy phase and examines the lived experience of schools to draw conclusions and make recommendations focused impacts and methodological progression Contributors Renae Acton Scott Alterator Benjamin Cleveland Craig Deed Matthew Dwyer Debra Edwards Neil Gislason Wesley Imms Peter Lippman Elizabeth Matthews Marcus Morse Vaughan Prain Matthew Riddle Warren Sellers Rebecca Townsend and Adam Wood
