The 4IR and teacher education in South Africa Felix Maringe, Otilia Chiramba, 2024-02-26 The 4IR has become an overarching framework within which education systems including teacher education are operating Contingent upon the ideology of neo liberalism the 4IR seeks to transform societies in ways which respond to the relentless developments in technology the Internet and digital capacities which by design and intent are purposed at increasing both productivity and the associated quality while at the same time reducing human intervention in the same processes In teacher education how we teach and train student teachers will be substantially influenced by the imperatives of the 4IR There are multiple unresolved questions as the 4IR takes centre stage For example what will it mean for teaching and learning in schools that have severe technological and digital deficits for teachers and students who have minimal technological literacies for delivering high quality teaching and learning for transforming both the content and pedagogies of teacher education and above all for delivering socially just educational experiences for all our learners regardless of class race and privilege The discourse of the 4IR is contemporary and requires multiple perspectives to explore what it means in different contexts and settings the understandings it engenders in people what it implies across a wide range of educational decision making levels and that its fundamental assumptions cohere with national and societal assumptions about equality equity and social justice Multiple methodological approaches were utilised in the interrogation of the idea of the 4IR in teacher education in South Africa including theoretical empirical and small scale case studies amongst others The data these approaches provide are equally valued based on the purposes for which they have been derived

Differentiating Instruction With Menus Laurie E. Westphal, 2021-09-03 Differentiating Instruction With Menus Chemistry offers teachers everything needed to create a student centered learning environment based on choice This book uses different types of menus that students can use to select exciting advanced level products that they will develop so teachers can assess what has been learned instead of using a traditional worksheet format

Topics addressed include chemistry basics measurements atoms chemical bonding and reactions gas laws energy acids and bases and nuclear and organic chemistry Differentiating Instruction With Menus Chemistry contains attractive reproducible menus each based on the levels of Bloom's revised taxonomy as well as incorporating different learning styles These menus can be used to guide students in making decisions as to which products they will develop after studying a major concept or unit Grades 9-12

Improving Student Learning One Teacher at a Time Jane E. Pollock, Laura J. Tolone, 2020-12-16 In this second edition of *Improving Student Learning One Teacher at a Time* Jane E. Pollock and Laura J. Tolone combine updated research and real world stories to demonstrate how it takes only one teacher to make a difference in student performance Their approach expands the classic three part curriculum instruction assessment framework by adding one key ingredient feedback This Big Four approach offers an easy to follow process that helps teachers build better curriculum documents with Curriculum standards that are clear and well paced and describe what students will learn Instruction based in research from daily lessons to whole units of study Assessment that maximizes feedback and requires critical and creative thinking Feedback that tracks and reports individual student progress by standards Pollock and Tolone demonstrate how consistent timely feedback from multiple sources can help students monitor their own understanding and help teachers align assignments quizzes and tests more explicitly to the standards The Big Four shifts the focus away from the basics of what makes a good teacher toward what makes good learning happen for every student every day
