Greenfield,Letizia Paoli,2022-04-28 Assessing the Harms of Crime provides a firm analytical foundation for making normative decisions about criminal and related policy taking harm and its reduction as a conceptual starting point and supplying the means for systematic empirical analysis in a harm assessment framework By exploring harm s place in legal history theory criminology and related fields and by considering the relevance of harm and its reduction for both criminal policy and the governance of security the book demonstrates the centrality of harm including its reduction to crime policy and governance It also highlights a substantial gap in methods available to the policy community to take on harm and the challenges of developing them Working to fill that gap the book presents the authors Harm Assessment Framework consisting of tools and a process to identify evaluate and rank harms and to carefully distinguish between harms that result directly from activities and those that are remote or driven at least partially by policy The book also presents applications to complex crimes primarily involving coca and cocaine that show the framework s value with new actionable insight to harm and policy On this basis the book argues that criminology would benefit from expanding its mission to include harm and target harm reduction and from positioning harm assessment as a core task Lastly it posits that systematic empirical harm based policy analysis can contribute positively to decisions about criminal policy and the governance of security and to advancing justice **The Globalization of Evidence-Based Policing** Eric L.
