And Super Natural New Vision Unexplained:

The Super Natural Whitley Strieber, Jeffrey J. Kripal, 2017-09-26 Two of today's maverick authors on anomalous experience present a perception altering and intellectually thrilling analysis of why the paranormal is real but radically different from what is conventionally understood Whitley Strieber Communion and Jeffrey J Kripal J Newton Rayzor professor of religion at Rice University team up on this unprecedented and intellectually vibrant new framing of inexplicable events and experiences Rather than merely document the anomalous these authors one the man who popularized alien abduction and the other a renowned scholar and renegade advocate for including the paranormal in religious studies The New York Times deliver a fast paced and exhilarating study of why the supernatural is neither fantasy nor fiction but a vital and authentic aspect of life Their suggestion That all kinds of impossible things from extra dimensional beings to bilocation to bumps in the night are not impossible at all rather they are a part of our natural world But this natural world is immeasurably more weird more wonderful and probably more populated than we have so far imagined with our current categories and cultures which are what really make these things seem impossible The Super Natural considers that the natural world is actually a super natural world and all we have to do to see this is to change the lenses through which we are looking at it and the languages through which we are presently limiting it In short The extraordinary exists if we know how to look at and think about it

The Super Natural Whitley Strieber, Jeffrey J. Kripal, 2016 Two leading authors on the alien abduction and the religious anomalous experience present an intellectual analysis of why paranormal phenomena are a real however fantastical part of the natural world that can be authenticated through key changes in perspective Publisher's description *The Supernatural After the Neuro-Turn* Pieter F. Craffert, John R. Baker, Michael J. Winkelman, 2019-09-10 This book takes what is often referred to as the supernatural to be normal natural phenomena that are closely linked to the neurobiology of the human species Reflecting the neurocultural and biocultural perspective the chapters cover phenomena such as out of body experiences ghosts and experiences of spirit entities The contributors consider the supernatural as emerging from innate neurobiological structures and functions and reflecting known neurobiological processes that explain their universality and persistence Folklore, People, and Places Jack Hunter, Rachael Ironside, 2023-03-16 Folklore People and Place is a contribution towards better understanding the complex interconnectivity of folklore people and place across a range of different cultural and geographical contexts The book showcases a range of international case studies from different cultural and ecological contexts showing how folklore can and does mediate human relationships with people and place Folklore has traditionally been connected to place telling tales of the land and the real and imaginary beings that inhabit storied places These storytelling traditions and practices have endured in a contemporary world yet the role and value of folklore to people and places has changed The book explores a broad range of international perspectives and considers how the relationship between folklore people and place has evolved for tourists and indigenous communities It will showcase a range of

international case studies from different cultural and ecological contexts showing how folklore can and does mediate human relationships with people and place By exploring folklore in the context of tourism this book engages in a critical discussion of the opportunities and challenges of using storied places in destination development The case studies in the book provide an international perspective on the contemporary value of folklore to people and places engendering reflection on the role of folklore in sustainable tourism strategies This book will be of interest to students academics researchers in fields such as anthropology folklore tourism religious studies human geography and related disciplines It will also be of interest to scholars and practitioners of traditional ecological knowledge
