Artificial Intelligence in Accounting Othmar M. Lehner, Carina Knoll, 2022-08-05 Artificial intelligence AI and Big Data based applications in accounting and auditing have become pervasive in recent years. However research on the societal implications of the widespread and partly unregulated use of AI and Big Data in several industries remains scarce despite salient and competing utopian and dystopian narratives

This book focuses on the transformation of accounting and auditing based on AI and Big Data. It not only provides a thorough and critical overview of the status quo and the reports surrounding these technologies but it also presents a future outlook on the ethical and normative implications concerning opportunities, risks, and limits. The book discusses topics such as future human-machine collaboration, cybernetic approaches to decision making, and ethical guidelines for good corporate governance of AI-based algorithms and Big Data in accounting and auditing. It clarifies the issues surrounding the digital transformation in this arena, delineates its boundaries, and highlights the essential issues and debates within and concerning this rapidly developing field. The authors develop a range of analytic approaches to the subject, both appreciative and sceptical, and synthesise new theoretical constructs that make better sense of human-machine collaborations in accounting and auditing. This book offers academics a variety of new research and theory building on digital accounting and auditing, from and for accounting and auditing scholars, economists, organisations, and management academics and political and philosophical thinkers. Also, as a landmark work in a new area of current policy interest, it will engage regulators and policy makers, reflective practitioners, and media commentators through its authoritative contributions, editorial framing, and discussion, and sector studies and cases.

Sustainability in Accounting Education Maria Cadiz Dyball, Ian Thomson, Richard M.S. Wilson, 2015-10-14. Accounting sustainably involves accounting for and to the natural environment and accounting for and to society, including groups currently oppressed or disadvantaged by unsustainable processes and practices. This book creates a compelling case for the inclusion of sustainability at the heart of accounting educational programmes, offering critical lessons and identifying risks to avoid when designing accounting programmes and courses. Accounting sustainability has moved from the side lines of policy discourses, accounting institutions, professional accounting practices, and research activities into the mainstream. The chapters in this proposed book engage in a critical dialogue to facilitate change in accounting education for sustainability. They dispel the myth that accounting for sustainability is an oxymoron, bad for business, unrelated to practice, or contrary to professional accounting bodies' accreditation requirements. This book was originally published as a special issue of *Accounting Education*.

Future-Proof Accounting Mfon Akpan, 2024-07-19. Future Proof Accounting: Data and Technology Strategies equips accounting students, professors, and industry experts with the knowledge needed to navigate the dynamic realm of accounting.

The Routledge Companion to Accounting Education Richard M.S. Wilson, 2014-04-29. Many enquiries into the state of accounting education training undertaken in several countries over the past 40 years have warned that it must change if it is to be made more relevant to students, to the accounting profession, and to stakeholders in the wider community. This book's overriding aim is to provide a comprehensive and authoritative source of reference which defines the domain of accounting education training and which provides a critical overview of the state of this domain, including emerging and cutting edge issues, as a foundation for facilitating improved accounting education training, scholarship, and research in order to enhance the educational base of accounting.

practice The Routledge Companion to Accounting Education highlights the key drivers of change whether in the field of practice on the one hand e.g. increased regulation globalisation risk and complexity or from developments in the academy on the other e.g. pressures to embed technology within the classroom or to meet accreditation criteria on the other Thirty chapters written by leading scholars from around the world are grouped into seven themed sections which focus on different facets of their respective themes including student curriculum pedagogic and assessment considerations
