And World History War Crimes Antiquity:

A World History of War Crimes Michael S. Bryant, 2015-12-17 *A World History of War Crimes* provides a truly global history of war crimes and the involvement of the legal systems faced with these acts Documenting the long historical arc traced by human efforts to limit warfare from codes of war in antiquity designed to maintain a religiously conceived cosmic order to the gradual use in the modern age of the criminal trial as a means of enforcing universal norms this book provides a comprehensive one volume account of war and the laws that have governed conflict since the dawn of world civilizations Throughout his narrative Michael Bryant locates the origin and evolution of the law of war in the interplay between different cultures While showing that no single philosophical idea underlay the law of war in world history this volume also proves that war in global civilization has rarely been an anarchic free for all Rather from its beginnings warfare has been subject to certain constraints defined by the unique needs and cosmological understandings of the cultures that produce them Only in late modernity has law assumed its current international humanitarian form The criminalization of war crimes in international courts today is only the most recent development of the ancient theme of constraining when and how war may be fought

Nuremberg Principles and Ukraine Marshall J. Breger, Herbert R. Reginbogin, 2025-10-02 In this book contributors go in depth to analyze the crime of aggression crimes against humanity and their applicability in the context of the invasion of Ukraine The ongoing Russian invasion of Ukraine brings the principles of Nuremberg to the forefront of discussions on justice raising questions about the feasibility of Nuremberg style accountability The book touches upon the abduction of Ukrainian children and the destruction of Ukrainian cultural heritage Contributors also discuss the topic of war crime tribunals after Nuremberg including Timor and former Yugoslavia as well as tribunals in Rwanda Sierra Leone and others leading up to the International Criminal Court ICC Including essays by Oleksandra Matviichuk the Ukrainian Nobel

Laureate and Ambassador Dr Anton Korynevych Ukrainian minister and specialist in international law this book considers the contemporary relevance of the Nuremberg principles in the context of the Russian invasion of Ukraine *Negotiating Civil War* Henry Lovat, 2020-07-16 A theoretically informed critical account of the making of the international legal rules governing civil war *Global Crime* Philip L. Reichel, 2019-07-08 A definitive resource for understanding such far reaching and often interconnected crimes as cyber theft drug trafficking human smuggling identity theft wildlife poaching and sex tourism While many international corporations have benefited from the global economy and distribution of information globalization has also had serious negative consequences This important reference work offers students and general readers a critical understanding of how technology governments political unrest war and economic strife contribute to an increase in global crime This A Z encyclopedia covers key people events and organizations and includes key documents that will help readers to understand the numerous problems created by the many transnational crimes that are growing in severity and frequency around the world Entries address perpetrators and their methods victims who really profits and law enforcement responses In addition to cyber theft and sales of weapons and narcotics the set provides a detailed look at global crimes not typically covered such as corruption fraudulent medicine illegal sports betting organ trafficking maritime piracy trafficking in cultural property and wildlife and forest crime Although some historical events and people are included the focus is on recent and contemporary topics **Modern Genocide** Paul R. Bartrop, 2019-09-12 This book provides an indispensable resource for anyone researching the scourge of mass murder in the 20th and 21st centuries effectively using primary source documents to help them understand all aspects of genocide This illuminating primary source collection closely examines and analyzes primary documents related to genocides focusing on genocidal events from the beginning of the 20th century to the present Thematically organized into eight sections each document comes with an introduction and analysis written by the author that helps provide the crucial historical background for the users of this title to learn about the complexities of genocide The first section considers a range of definitional matters relating to genocide crimes against humanity and war crimes the second section relates to warnings of impending genocide and how they have been received the third considers atrocities and how they have been perpetrated the fourth is an examination of examines a range of resistance initiatives that have been taken in response to genocide the fifth looks at reactions to genocide from outside actors the sixth considers the ways in which states have intervened to stop genocide the seventh relates to post genocide justice measures and the eighth section relates to how states and NGOs have sought to prevent genocide **Experiences of War in Europe and the Americas, 1792-1815** Mark Lawrence, 2021-07-20 This work seeks to offer a new way of viewing the French Wars of 1792 1815 Most studies of this period offer international political and military analyses using the French Revolution and Napoleon as the prime mover But this book focuses on military and civilian responses to French Revolutionary and Napoleonic wars throughout the rest of Europe and the Americas It shows how the unprecedented mobilization of this era forged a generation

of soldiers and civilians sharing a common experience of suffering bequeathing the West with a new veteran sensibility Using a range of sources especially memoirs this book reveals the adventure and suffering confronting ordinary soldiers campaigning in Europe and the Americas and the burdens imposed on civilians enduring rising and falling empires across the West It also reveals how the wars liberated slaves serfs and common people through revolutions and insurgencies The End of Empires and a World Remade Martin Thomas,2024-03-19 A capacious history of decolonization from the decline of empires to the era of globalization Empires until recently were everywhere They shaped borders stirred conflicts and set the terms of international politics With the collapse of empire came a fundamental reorganization of our world Decolonization unfolded across territories as well as within them Its struggles became internationalized and transnational as much global campaigns of moral disarmament against colonial injustice as local contests of arms In this expansive history Martin Thomas tells the story of decolonization and its intrinsic link to globalization He traces the connections between these two transformative processes the end of formal empire and the acceleration of global integration market reorganization cultural exchange and migration The End of Empires and a World Remade shows how profoundly decolonization shaped the process of globalization in the wake of empire collapse In the second half of the twentieth century decolonization catalyzed new international coalitions it triggered partitions and wars and it reshaped North South dynamics Globalization promised the decolonized greater access to essential resources to wider networks of influence and to worldwide audiences but its neoliberal variant has reinforced economic inequalities and imperial forms of political and cultural influences In surveying these two codependent histories across the world from Latin America to Asia Thomas explains why the deck was so heavily stacked against newly independent nations Decolonization stands alongside the great world wars as the most transformative event of twentieth century history In The End of Empires and a World Remade Thomas offers a masterful analysis of the greatest process of state making and empire unmaking in modern history Climate Change Action and the Responsibility to Protect Ben L. Parr,2023-11-29 This book brings together two important fields in the study of international politics and policy climate change adaptation and mitigation climate action and the Responsibility to Protect R2P Both have attracted strong scholarly attention in each of their respective research silos but there is yet to be a strong research push that explores the relationship between the two Filling this gap Ben L Parr argues that the climate action and the R2P agendas share a common goal to protect vulnerable human populations from large scale harm To substantiate this argument Parr reveals where the historical conceptual and operational parallels exist between the two agendas and where and when researchers and practitioners from both camps might work together in practice to achieve their common goal in the challenging years ahead Notably the book builds on recent efforts by Western governments in the UK US and EU to integrate climate action policies into conflict prevention and response policies To achieve this the volume situates a variety of climate action policies alongside the 46 policy options found in the R2P operational framework commonly known as the R2P toolbox across its

prevention reaction and rebuilding phases Climate Change Action and the Responsibility to Protect will be of significant interest to policy orientated students and scholars those working at the academic policy interface in the NGO community as well as those working in government and international organisations

A Humanitarian Critique of International Humanitarian Law Kailash Jeenger, 2025-08-28 This book offers a critical assessment of international humanitarian law by employing mainly the Third World Approaches to International Law TWAIL which encompass the critical Marxist gender critical race and post colonial theories The book contains a materialist account of the historical development of the law in order to investigate its problematic foundations and reveal how the imperialist and capitalist tendencies shaped the content of this law It discusses the history of exclusion of the Third World from the negotiations and application of the law It underscores how the law helped the colonizers maintain their domination The book also engages deeply with the negotiating history of the 1949 Geneva Conventions and the 1977 Protocols in order to understand the perspectives of the Third World and the dominating nations It further examines critically the rules and principles of international humanitarian law in order to inquire into their real character and see to what extent they fulfil the humanitarian goals especially when this body of law is glorified and marketed in the name of International Humanitarian Law The critical analysis of the rules and principles highlights the gaps in the protection of victims of armed conflict and exposes their vague and unworkable language that often facilitates and legitimates violence The book thus questions and challenges the humanitarian face of international humanitarian law As the book offers a critical perspective it is going to be an unavoidable reference material on the subject especially for students pursuing masters doctoral and post doctoral programs The multi disciplinary nature of the subject renders the book useful in a variety of courses in social sciences and humanities at different levels The utility of the book is not confined to the academic world only and it is beneficial for international bodies humanitarian actors army officials diplomats think tanks non governmental organizations human rights activists and research organizations
