ubiquitous the issues of dependability become more and more critical Given that solutions to these issues must be planned at the beginning of the design process it is appropriate that these issues be addressed at the architectural level This book is inspired by the ICSE 2002 Workshop on Architecting Dependable Systems it is devoted to current topics relevant for improving the state of the art for architecting dependability Some of the 13 peer reviewed papers presented were initially presented at the workshop others were invited in order to achieve competent and complete coverage of all relevant aspects The papers are organized in topical sections on architectures for dependability fault tolerance in software architectures dependability analysis in software architectures industrial experience Fully Integrated Data Environments Malcolm P. Atkinson, Ray Welland, 2012-12-06 Research into Fully Integrated Data Environments FIDE has the goal of substantially improving the quality of application systems while reducing the cost of building and maintaining them Application systems invariably involve the long term storage of data over months or years Much unnecessary complexity obstructs the construction of these systems when conventional databases file systems operating systems communication systems and programming languages are used This complexity limits the sophistication of the systems that can be built generates operational and usability problems and deleteriously impacts both reliability and performance This book reports on the work of researchers in the Esprit FIDE projects to design and develop a new integrated environment to support the construction and operation of such persistent application systems It reports on the principles they employed to design it the prototypes they built to test it and their experience using it **Angola** Mike Stead, Sean Rorison, 2009 Angola offers over 1 000km of unspoilt beaches excellent fishing and surfing tropical forests and magnificent bird life This guidebook to the country outlines the unique attractions of the African nation Autonomous Bidding Agents Michael P. Wellman, Amy Greenwald, Peter Stone, 2007 E commerce increasingly provides opportunities for autonomous bidding agents computer programs that bid in electronic markets without direct human intervention Automated bidding strategies for an auction of a single good with a known valuation are fairly straightforward designing strategies for simultaneous auctions with interdependent valuations is a more complex undertaking This book presents algorithmic advances and strategy ideas within an integrated bidding agent architecture that have emerged from recent work in this fast growing area of research in academia and industry The authors analyze several novel bidding approaches that developed from the Trading Agent Competition TAC held annually since 2000 The benchmark challenge for competing agents to buy and sell multiple goods with interdependent valuations in simultaneous auctions of different types encourages competitors to apply innovative techniques to a common task The book traces the evolution of TAC and follows selected agents from conception through several competitions presenting and analyzing detailed algorithms developed for autonomous bidding Autonomous Bidding Agents provides the first integrated treatment of methods in this rapidly developing domain of AI The authors who introduced TAC and created some of its most successful agents offer both an overview of current research and new results Michael P Wellman is Professor of Computer
