A Mind So Rare The Evolution Of Human Consciousness:

A Mind So Rare Merlin Donald, 2002 Donald psychology Queen's University Canada challenges the prevailing view that seeks to explain away human consciousness and presents a theory on the origins of the modern mind He describes the cultural and neuronal forces that power human modes of awareness and proposes that the human mind is a hybrid product of the interweaving of the brain with an invisible symbolic web of culture to form a distributed cognitive network Using evidence from brain and behavioral studies of humans and animals he explains how an expansion of consciousness transcends the limitations of the mammalian mind and elaborates the foundations of self evaluation and self reflection c Book News Inc

A Mind So Rare Merlin Donald, 2002 Merlin Donald refutes the arguments of certain scientists and philosophers who have dismissed consciousness as a superficial byproduct of evolution or even an entirely irrelevant factor in human cognition His thesis presents the forces both cultural and neuronal that power our distinctively human modes of awareness Donald proposes that the human mind is a hybrid product of interweaving a super complex form of matter the brain with an invisible symbolic web culture to form a distributed cognitive network This hybrid mind allowed humanity as a species to break free of the limitations of the mammalian brain Marshaling evidence from brain and behavioral studies of humans and animals Donald explains how an expansion of conscious capacity was the key to this revolutionary development and insightfully projects how the human mind might adapt in the future as we fall increasingly under the spell of symbolic technology *The Sacred and the Political* Elisabetta Brighi, Antonio Cerella, 2016-07-28 What is the relationship between the sacred and the political transcendence and immanence religion and violence And how has this complex relation affected the history of Western political reason In this volume an international group of scholars explore these questions in light of mimetic theory as formulated by Ren Girard 1923 2015 one of the most original thinkers of our time From Aristotle and his idea of tragedy passing through Machiavelli and political modernity up to contemporary biopolitics this work provides an indispensable guide to those who want to assess the thorny interconnections of sacrality and politics in Western political thought and follow an unexplored yet critical path from ancient Greece to our post secular condition While looking at the past this volume also seeks to illuminate the future relevance of the sacred secular divide in the so called age of globalization

The Bible and Science Vincent Smiles, 2011-06-01 Confusing paradox surrounds the Bible Some look to it as the definition of reality and deny science others see science alone as the arbiter of truth and deny the Bible Both extremes are merely symptoms of a still wider debate on the place of ancient spiritual wisdom in a science dominated world Following the Reformation and Enlightenment the Western world gained great power but lost its spiritual bearings This book draws on numerous sources ancient and modern to examine what the missteps were that have brought us to a point of such confusion and in doing so argues cogently against the modern philosophy of scientific materialism With the aid of biblical stories and imagery it suggests how we might find our way back to balance where ancient wisdom and modern science can together shed light on humans and their encompassing reality Vincent Smiles is professor of theology at Saint John s University Collegeville Minnesota **Reading Richard Dawkins** Gary Keogh, 2014-02-01 Theological reactions to the rise of the new atheist

movement have largely been critically hostile or defensively deployed apologetics to shore up the faith against attack Gary Keogh contends that focusing on scholarly material that is inherently agreeable to theology will not suffice in the context of modern academia Theology needs to test its boundaries Engaging Richard Dawkins illustrates how dialogue with antithetical viewpoints may offer new perspectives on classical theological problems Keogh demonstrates how a dialogical paradigm may take shape one which is up to the task of facing its critics in the context of modern academia **Quintessence of Dust:**

The Science of Matter and the Philosophy of Mind Harry Redner, 2020-03-23 *Quintessence of Dust* by Harry Redner argues for a science of matter and a philosophy of mind based on emergence Mind emerges from matter through five essential stages quintessence Hamlet Human mind is differentiated from animal mind primarily by reference to art Homo ludens This approach draws support from Donald Edelman and other palaeoanthropologists psychologists and neurologists The emergent relation between two entities is defined as an indissoluble non identity The mind as machine thesis artificial intelligence and cognitivism are criticised The alternative emergentist approach comes close to Spinoza The book attempts a
