Consequently, both high skilled and low skilled immigrant workers are increasing. In addition, workplaces are continually changing in step with the introduction of new technologies, materials, and work processes, together with the changes in the labor market, the new forms of employment, and the new work organizations. These changes lead to new opportunities for employees and employers but also to new risks or re-actualization of old organizational risks. According to the EU OSHA, the key points that describe the evolution that is currently ongoing in the world of work are globalization, the technical innovation, and the aging population.

On one hand some older potential risks are reappearing in organizations intensive fear and worries organizational anxiety boredom physical violence alienation segregation loneliness and isolation On the other hand re emerging perceived organizational features seem vital for organizations and more important today than ever Central constructs in the study of organizational behavior and organizational health such as perceived organizational support commitment in organizational context socialization processes change capacity of organizations perceived organizational justice ergonomics and motivation nowadays seem increasingly important and renewed *Monthly Catalogue, United States Public Documents* ,1984
