Assessment in Medical Education and Training Neil Jackson,Alex Jamieson,Anwar Khan,2023-07-14 This work contains a foreword by Dame Lesley Southgate President Royal Free and University College Medical School London Assessment is a key method of improving standards as well as establishing competency However despite major developments in the assessment of clinical competence in the last two decades there is still more bad practice and ignorance of significant issues in this area than any other aspect of medical higher education This book comprehensively covers all aspects of assessment It considers current and future policy and practice including the Modernising Medical Careers training programme it promotes a system incorporating more meaningful assessments rather than just tests of knowledge and skill Assessment in Medical Education and Training will be useful to everyone involved in healthcare education including tutors trainers clinical supervisors and assessors in both primary and secondary care It will also be important reading for consultants and general practitioners with responsibility for registrars and healthcare education policy makers and shapers Acquisition of knowledge and skills is not sufficient alone we need to be able to apply the knowledge skills and strategies learnt and in turn these can be the appropriate targets of assessment There is a movement away from traditional multiple choice tests to assessments that include a wide variety of methods and so provide for more meaningful assessments which can better capture significant outcomes in order to assure their future success Neil Jackson Alex Jamieson and Anwar Khan in the Introduction This thoughtful provocative and eclectic book is published at a time of enormous change in the content structure and quality assurance of postgraduate medical education in the United Kingdom The reader will be challenged and stimulated by the variety of views and emphases Essential Dame Lesley Southgate in the Foreword **Multidisciplinarity and**

Interdisciplinarity in Health Nima Rezaei,2022-08-02 The contributed volume Multidisciplinarity and Interdisciplinarity in Health is a health centered volume of the Integrated Science Book series Lack of confidence lack of expertise complexities of healthcare the confusing nature of healthcare environments and lack of organization and standardization can become obstacles to successful communication This volume establishes how extensive is the interface between formal sciences and

medical sciences on health related issues The book provides an overview of the value of the integration of formal biological and medical sciences and related products i e health informatics and biomedical engineering to frame a holistic approach to health systems healthcare medical practice drug discovery and medical device design The book also focuses on innovative solutions to the most critical issues of different health crisis including obesity infectious outbreaks and cancer that can be found by using an integrative approach It also contains the fascinating crossroads between medical sciences physics and mind that is discussed from multiple perspectives on cognition neuroscience and psychiatry These multidisciplinary considerations will expand the concepts of creativity leadership aesthetics empathy and mental health

Essential Skills for a Medical Teacher E-Book Ronald M Harden, Jennifer M Laidlaw, 2012-04-25 Essential Skills for a Medical Teacher is a new book that will serve as a perfect introduction for new teachers to the exciting opportunities facing them whether they are working in undergraduate postgraduate or continuing education It will also be of considerable use to more experienced teachers to review and assess their own practice and gain a new perspective on how best to facilitate their students or trainees learning The contents are based on the authors extensive experience of what works in medical education whether in teaching and curriculum planning or in the organisation of faculty development courses in medical education at basic and advanced levels About the authors Ronald M Harden is General Secretary for the Association of Medical Education in Europe Editor of Medical Teacher former Professor of Medical Education Director of the Centre for Medical Education and Teaching Dean at the University of Dundee UK and Professor of Medical Education at Al Imam University Riyadh Saudi Arabia He is internationally recognised for his commitment to developing new approaches to medical education curriculum planning and to teaching and learning His contributions to excellence in medical education have attracted numerous awards Jennifer M Laidlaw is Former Assistant Director of the Education Development Unit of the Scottish Council for Postgraduate Medical and Dental Education and the University of Dundee UK She has planned organised and lead courses on medical education both in Dundee and overseas She has acted as a medical education consultant for the World Health Organisation the British Council medical schools and colleges The text provides hints drawn from practical experience to help teachers create powerful learning opportunities for their students providing readable guidelines and introducing new techniques that potentially could be adopted for use in any teaching programme Throughout the book introduces some key basic principles that underpin the practical advice that is given and which will help to inform teaching practice This book will assist readers to reflect on and analyse with colleagues the different ways that their work as a teacher or trainer can be approached and how their student or trainee s learning can be made more effective

International Handbook of Medical Education Ibrahim Al Alwan, Mohi Eldin Magzoub, Margaret Elzubeir, 2012-03-19 Medical education has grown expeditiously in the last decade triggered by innovations in educational approaches such as problem based learning PBL and community based education CBE This had led to medical schools establishing departments for medical education and developing special

introductory courses for undergraduate curricula As a result an enormous amount of literature is now available for teachers and medical educators but only a limited amount of medical education material is aimed directly at students The International Handbook of Medical Education takes the lead by giving students access to basic medical education knowledge and skills presented in a simple and interactive format The Handbook provides students with a tool to guide them on the road to success during their academic lives and beyond by helping to improve study skills such as reading writing searching and research and giving students essential information on assessment skills such as answering multiple choice questions and preparing for objective structured clinical examination With this handbook students will develop the knowledge skills and attitudes that will advance their care

Routledge International Handbook of Medical Education Khalid

Abdulrahman, Stewart Mennin, Ronald Harden, Catherine Kennedy, 2015-07-16 Twenty first century medical schools postgraduate bodies and other medical education organisations are responding to rapid advances in medicine healthcare delivery educational approaches and technology and globalisation Differences in geography culture history and resources demand diversity amongst educational systems This important volume is designed to help medical educators working in today s challenging circumstances by providing an overview of best practices and research in medical education Routledge International Handbook of Medical Education provides a practical guide to and theoretical support for the major education challenges facing teachers managers and policy makers around the world Highlighting how resources can be used to provide effective and sustainable responses to the key issues facing medical educators the handbook offers a truly international perspective of best practices with contributing editors and authors from around the globe Routledge International Handbook of Medical Education recognises the need to maintain established best practices when appropriate and to respond adaptively to cultural differences and local conditions facing medical education This topical book deals with the key challenges facing medical education by the different stakeholders including selection and admission of students to study medicine competences necessary for graduates to enable them to recognize and address emerging health issues and policies teaching and learning processes that are necessary to meet tomorrow s challenges approaches to assessment including the integration of assessment and learning design and management of complex curricula that provide educational strategies to meet regional and global problems A unique diverse and illustrative resource of best practices in medical education the handbook is stimulating reading for all educators of present and future health care professionals
