Beyond Geography The Western Spirit Against The Wilderness:

Beyond Geography Frederick W. Turner, 1983 **Nature and Psyche** David W. Kidner, 2000-11-02 Nature and Psyche argues that psychological and environmental writing and action are all too often colonized by the same assumptions that inhibit ecological and cultural diversity Industrialized monocultures conceal the character of our alienation from nature and thus prevent the emergence of effective solutions Drawing on a diversity of disciplines David Kidner illustrates that traditional psychological understanding is often inherently hostile to the natural order and that the dominant form of selfhood that has emerged in the industrialized world promotes the domestication of nature In fact even some of the most radical environmentalists who simplistically oppose technology are also trapped within this paradigm The author demonstrates that a more critical historical and cultural awareness rooted in nature can enable a re integration of nature and psyche

Environmental Problems in America's Garden of Eden Gordon Morris Bakken, Brenda Farrington, 2001 This anthology examines Love's Labours Lost from a variety of perspectives and through a wide range of materials Selections discuss the play in terms of historical context dating and sources character analysis comic elements and verbal conceits evidence of authorship performance analysis and feminist interpretations Alongside theater reviews production photographs and critical commentary the volume also includes essays written by practicing theater artists who have worked on the play An index by name literary work and concept rounds out this valuable resource

Apocalypse Now and Then Catherine Keller, 2004-12-01 In her brilliant wide ranging nuanced study of apocalypse Keller has written a definitive cultural and theological essay In this book she is doing the work of the true intellectual providing learned passionate guidance for living the good life all of us together here and now on our planet Sallie McFague Distinguished Theologian in Residence Vancouver School of Theology A richly evocative exploration of apocalyptic's ambiguous possibilities Inspiring in the fullest personal political and religious senses of the term Kathryn Tanner University of Chicago Divinity School Catherine Keller is a poet among theologians Her writing attains imaginative heights and depths that expose the flatly prosaic character of most theological work One finds oneself lingering over sentences images and tropes hearing them resonate with connections and insights Peter Hodgson Journal of the American Academy of Religion

A Harmony Within: Five Who Took Refuge William A. Reinsmith, 2007-05-22 We live in increasingly troubled times with social and political instability everywhere on the globe It is a time of breakdown of massive transition whose end is far from sight Incessant change fragmentation loss of moorings sporadic violence even in the Western societies threaten many who seek to live meaningful lives especially in terms of inward growth To the media driven observer the world is in turmoil and globalization by no means a friendly word Similar conditions have prevailed at certain times in the past Reinsmith's port of entry is just at those periods of crisis those transition periods when social cohesion has all but disintegrated A Harmony Within explores five such points in the history of Western civilization the breakdown of the ancient Greek city state the last days of the Roman Empire the religious wars in France

during the sixteenth century the transition to the Industrial Age in nineteenth century America the cataclysm of World War I in Europe Within each historical frame the author charts the life and times of one individual who even in the midst of discord finds a way of living fruitfully of making a profound connection which transcends the uncertainties of his particular age In ancient Greece the philosopher Epicurus withdrew from Athens to teach inner tranquility ataraxia to his friends At the end of the Roman era St Benedict founded a safe haven at Monte Casino where he created the Rule which offered spiritual security to his monks With strife all around him Michel Montaigne quit public life and retreated to his Tower to mingle with the great minds of the past Viewing the desperation drudgery of his fellow citizens Henry David Thoreau repaired to Walden Pond there to live alone with Nature for almost two years In a Europe slowly moving toward war Albert Einstein found refuge in the Cosmos where he could contemplate the laws of the physical universe The names of these five individuals are known to the educated general reader Each of them lived in a different era discovered a different track Yet they had one thing in common They chose neither to grapple with their own society nor directly aid in the coming of the next They did something more radical They withdrew they chose to walk away to take refuge and follow a path where inner harmony could be attained They took arms against the troubles of their age not by encounter but by creative withdrawal Epicurus The Refuge of Philosophy St Benedict The Refuge of Religion Montaigne The Refuge of Letters Thoreau The Refuge of Nature Einstein The Refuge of Pure Science For each of these figures their refuge proved life enhancing Yet a great paradox ensued Though they withdrew from the society of their times what they accomplished reached far beyond them into the future Epicurean communities spread throughout the ancient Mediterranean world and lasted for five hundred years Benedictine monasticism provided Western Europe with spiritual direction down to the Middle Ages Montaigne's Essays have found their place among the annals of great literature Thoreau's stay at Walden Pond immortalized in his journal Walden became the exemplar for living with Nature and a guide for achieving radical simplicity Einstein's four papers written during his years in a Swiss Patent office would be the foundation for the theories of special and general relativity as well as quantum physics all of which would change our view of the universe Each chapter opens with a brief sketch of the age in which a protagonist lives and against which he reacts To this extent A Harmony Within presents a rough outline of Western civilization in crisis But the heart of the book lies in portraying how these five great spirits nursed a calling which brought inner harmony to their lives a harmony which seems to elude most humans at any period reg

Currents in Transatlantic History Steven G.

Reinhardt, 2017-06-07 Transatlantic historians are dedicated to analyzing the dynamic process of encounter interchange and creolization that was initiated when peoples on different sides of the Atlantic Basin first made contact and continues until the twenty first century The forty ninth annual Walter Prescott Webb Memorial Lecture Series Currents in Transatlantic Thought was organized to commemorate the fifteenth anniversary of the University of Texas at Arlington's doctoral program in transatlantic history Six alumni of the program were invited to return and present their ongoing research in this new

Nature: From nature to natures : contestation and reconstruction David Inglis, John Bone, Rhoda Wilkie, 2005 Many influential stances within the social sciences regard nature in one of two ways either as none of their concern which is with the social and cultural aspects of human existence or as wholly a social and cultural fabrication But there is also another strand of social scientific thinking that seeks to understand the interplay between social and cultural factors on one side and natural factors on the other These volumes contain the main contributions that have been made within each of these streams of thought The selections illustrate to the reader the complexity of the various positions within these streams and the strengths and limitations of each perspective A new introduction places these articles in their historical and intellectual context and the volumes are completed with an extensive index and chronological table of contents

Living in the Shadow of the Cross Paul Kivel, 2013-10-01 How our dominant Christian worldview shapes everything from personal behavior to public policy and what to do about it Over the centuries Christianity has accomplished much which is deserving of praise Its institutions have fed the hungry sheltered the homeless and advocated for the poor Christian faith has sustained people through crisis and inspired many to work for social justice Yet although the word Christian connotes the epitome of goodness the actual story is much more complex Over the last two millennia ruling elites have used Christian institutions and values to control those less privileged throughout the world The doctrine of Christianity has been interpreted to justify the killing of millions and its leaders have used their faith to sanction participation in colonialism slavery and genocide In the Western world Christian influence has inspired legislators to continue to limit women's reproductive rights and has kept lesbians and gays on the margins of society As our triple crises of war financial meltdown and environmental destruction intensify it is imperative that we dig beneath the surface of Christianity's benign reputation to examine its contribution to our social problems Living in the Shadow of the Cross reveals the ongoing everyday impact of Christian power and privilege on our beliefs behaviors and public policy and emphasizes the potential for people to come together to resist domination and build and sustain communities of justice and peace Paul Kivel is the award winning author of Uprooting Racism and the director of the Christian Hegemony Project He is a social justice activist and educator who has focused on the issues of violence prevention oppression and social justice for over forty five years

The Epic History of the American West William Nester, 2025-10-30 The American West evokes powerful imagery warriors on horseback cowboys in saloons and pioneers in wagons heading

westward It symbolizes freedom reinvention and the American Dream However this idealized image obscures the complex often violent history of the West which is as unjust as it is inspiring Historians debate the boundaries of the American West but it s clear that it s a dynamic concept both a place and an idea evolving over time For three centuries the frontier and western history overlapped until the frontier disappeared in 1890 Early narratives celebrated explorers settlers and entrepreneurs who developed the West portraying them as heroic figures However modern historians criticize this triumphant view highlighting the exploitation racism and ecological damage caused by Western expansion They focus on marginalized groups racial minorities women and workers while critiquing the often overlooked injustices faced by Indigenous peoples and others This revisionist perspective emphasizes the darker aspects of Western history challenging previous glorifications of development and heroism The Epic History of the American West bridges traditional and revisionist views exploring the region s complex legacy from violent struggles to ongoing cultural and ideological conflicts It reflects the West s enduring significance blending history and mythology to reveal its multifaceted nature
