Beyond Kinship Social And Material Reproduction In House Societies:

Beyond Kinship Rosemary A. Joyce, Susan D. Gillespie, 2000-05-08 Skillfully edited by Joyce and Gillespie the volume *Beyond Kinship* illustrates the breadth of investigations into history people and place that L vi Strauss s formulation makes possible Current Anthropology **Beyond the Horizon** Clifford Sather, Timo Kaartinen, 2008-05-16 Society is never just a localized aggregate of people but exists by virtue of its members narrative and conceptual awareness of other times and places In Jukka Siikala s work this idea evolves into a broad ethnographic and theoretical interest in worlds beyond the horizon in the double sense of past and abroad This book is a tribute to Jukka s contributions to anthropology by his colleagues and students and marks his 60th birthday in January 2007 By exploring the near distant inward and outward horizons towards which societies project their reality the authors aim at developing a new productive language for addressing culture as a way of experiencing and engaging the world **The Neighborhood as a Social and Spatial Unit**

in Mesoamerican Cities M. Charlotte Arnauld, Linda R. Manzanilla, Michael E. Smith, 2012-12-06 Recent realizations that prehispanic cities in Mesoamerica were fundamentally different from western cities of the same period have led to increasing examination of the neighborhood as an intermediate unit at the heart of prehispanic urbanization This book addresses the subject of neighborhoods in archaeology as analytical units between households and whole settlements The contributions gathered here provide fieldwork data to document the existence of sociopolitically distinct neighborhoods within ancient Mesoamerican settlements building upon recent advances in multi scale archaeological studies of these communities Chapters illustrate the cultural variation across Mesoamerica including data and interpretations on several different cities with a thematic focus on regional contrasts This topic is relatively new and complex and this book is a strong contribution for three interwoven reasons First the long history of research on the Teotihuacan barrios is scrutinized and withstands the test of new evidence and comparison with other Mesoamerican cities Second Maya studies of dense settlement patterns are now mature enough to provide substantial case studies Third theoretical investigation of ancient urbanization all over the world is now more complex and open than it was before giving relevance to Mesoamerican perspectives on ancient and modern societies in time and space This volume will be of interest not only to scholars and student specialists of the Mesoamerican past but also to social scientists and urbanists looking to contrast ancient cultures worldwide Houses Transformed

Jonathan Alderman, Rosalie Stolz, 2024-01-05 Over the decades there has been a world wide transformation of so called vernacular houses Based on ethnographic accounts from different regions *Houses Transformed* investigates the changing practices of building houses in a transnational context It explores the intersection of house biographies and social change the politics of housing design the social fabrication of aspirational houses the domestication of concrete and the intersection of materiality and ontology as well as the rhetoric of the vernacular The volume provides new anthropological pathways to understand the dynamics of dwelling in the 21st century These "Thin Partitions" Joshua Englehardt, Ivy

Rieger,2017-05-15 These Thin Partitions explores the intellectual and methodological differences that separate two of the four subdisciplines within the field of anthropology archaeology and cultural anthropology Contributors examine the theoretical underpinnings of this separation and explore what can be gained by joining them both in university departments and in field research In case studies highlighting the benefits of interdisciplinary collaboration contributors argue that anthropologists and archaeologists are simply not speaking the same language and that the division between fields undermines the field of anthropology as a whole Scholars must bridge this gap and find ways to engage in interdisciplinary collaboration to promote the health of the anthropological discipline By sharing data methods and ideas archaeology and cultural anthropology can not only engage in more productive debates but also make research accessible to those outside academia These Thin Partitions gets to the heart of a well known problem in the field of anthropology and contributes to the ongoing debate by providing concrete examples of how interdisciplinary collaboration can enhance the outcomes of anthropological research Contributors Fredrik Fahlander Lilia Fernandez Souza Kent Fowler Donna Goldstein Joseph R Hellweg Derek Johnson Ashley Kistler Vincent M LaMotta John Monaghan William A Parkinson Paul Shankman David Small

Reconsidering Mississippian Communities and Households Elizabeth Watts Malouche,Alleen

Betzenhauser,2021-04-20 Explores the archaeology of Mississippian communities and households using new data and advances in method and theory Published in 1995 Mississippian Communities and Households edited by J Daniel Rogers and Bruce D Smith was a foundational text that advanced southeastern archaeology in significant ways and brought household level archaeology to the forefront of the field Reconsidering Mississippian Communities and Households revisits and builds on what has been learned in the years since the Rogers and Smith volume advancing the field further with the diverse perspectives of current social theory and methods and big data as applied to communities in Native America from the AD 900s to 1700s and from northeast Florida to southwest Arkansas Watts Malouche and Betzenhauser bring together scholars researching diverse Mississippian Southeast and Midwest sites to investigate aspects of community and household construction maintenance and dissolution Thirteen original case studies prove that community can be enacted and expressed in various ways including in feasting pottery styles war and conflict and mortuary treatments **The Walking Dead at**

Saqqara Lara Weiss,2022-06-21 Funerary rituals and the cult of the dead are classics of research in religious studies especially for ancient Egypt Still we know relatively little about how people interacted in daily life at the city of Memphis and its Saqqara necropolis in the late second millennium BCE By focussing on lived ancient religion we can see that the social and religious strategies employed by the individuals at Saqqara are not just means on the way to religious post mortem salvation nor is their self representation simply intended to manifest social status On the contrary the religious practices at Saqqara show in their complex spatiality a wide spectrum of options to configure sociality before and after one's own death The analytical distinction between religion and other forms of human practices and sociality illuminates the range of cultural

practices and how people selected modified or even avoided certain religious practices As a result pre funerary funerary and practices of the subsequent mortuary cults in close connection with religious practices directed towards other ancestors and deities allow the formation of imagined and functioning reminiscence clusters as central social groups at Saqqara creating a heuristic model applicable also to other contexts **An Archaeology of Land Ownership** Maria Relaki, Despina

Catapoti, 2013-10-23 Within archaeological studies land tenure has been mainly studied from the viewpoint of ownership A host of studies has argued about land ownership on the basis of the simple co existence of artefacts on the landscape other studies have tended to extrapolate land ownership from more indirect means Particularly noteworthy is the tendency to portray land ownership as the driving force behind the emergence of social complexity a primordial ingredient in the processes that led to the political and economic expansion of prehistoric societies The association between people and land in all of these interpretive schemata is however less easy to detect analytically Although various rubrics have been employed to identify such a connection most notable among them the concepts of cultures regions or even households they take the links between land and people as a given and not as something that needs to be conceptually defined and empirically substantiated An Archaeology of Land Ownership demonstrates that the relationship between people and land in the past is first and foremost an analytical issue and one that calls for clarification not only at the level of definition but also methodological applicability Bringing together an international roster of specialists the essays in this volume call attention to the processes by which links to land are established the various forms that such links take and how they can change through time as well as their importance in helping to forge or dilute an understanding of community at various circumstances

Ancient Households of the Americas John G. Douglass, Nancy Gonlin, 2012-04-15 In *Ancient Households of the Americas* archaeologists investigate the fundamental role of household production in ancient colonial and contemporary households Several different cultures Iroquois Coosa Anasazi Hohokam San Agust n Wankarani Formative Gulf Coast Mexico and Formative Classic Colonial and contemporary Maya are analyzed through the lens of household archaeology in concrete data driven case studies The text is divided into three sections Section I examines the spatial and social organization and context of household production Section II looks at the role and results of households as primary producers and Section III investigates the role of and interplay among households in their greater political and socioeconomic communities In the past few decades household archaeology has made substantial contributions to our understanding and explanation of the past through the documentation of the household as a social unit whether small or large rural or urban commoner or elite These case studies from a broad swath of the Americas make *Ancient Households of the Americas* extremely valuable for continuing the comparative interdisciplinary study of households Dwelling, Identity, and the Maya Scott R. Hutson, 2009-11-16 *Dwelling Identity and the Maya* offers a new perspective on the ancient Maya that emphasizes the importance of dwelling as a social practice Contrary to contemporary notions of the self as individual and independent the identities of the ancient

Maya grew from their everyday relations and interactions with other people the houses and temples they built and the objects they created exchanged cherished and left behind Using excavations of ancient Chunchucmil as a case study it investigates how Maya personhood was structured and transformed in and beyond the domestic sphere and examines the role of the past in the production of contemporary Maya identity
