Progress in Medicinal

Chemistry,2019-03-14 Progress in Medicinal Chemistry Volume 58 provides a review of eclectic developments in medicinal chemistry with each chapter written by an international board of authors Topics covered in this new release include Amyotrophic lateral sclerosis ALS Covalent binding Drugs Natural Product Drug Delivery A Special Challenge and SMN2 gene splicing modifier and more Provides extended timely reviews of topics in medicinal chemistry Contains targets and technologies relevant to the discovery of tomorrow s drugs Presents analyses of successful drug discovery programs

Current Trends and Future Developments on (Bio-) Membranes Angelo Basile,Kamran Ghasemzadeh,2023-09-14 Current

Trends and Future Developments on Bio Membranes Recent Achievements for Ion Exchange Membranes focuses on introducing and analyzing ion exchange membranes performance and overviewing recent achievements in the structural development of ion exchange membranes in various applications Hence this book is a key reference text for R D managers in who are interested in the development of ion exchange membrane technologies as well as academic researchers and postgraduate students working in the wider area of strategic treatments separation and purification processes Reviews the ion exchange membranes including fundamentals and processes Provides thorough coverage of transport aspects and fundamentals of various ion exchange membranes systems such as fuel cells electrodialysis and more Describes the two main categories of ion exchange membranes inorganic and organic Covers numerous new applications of ion exchange membranes

Recent Progress and Development in Nanostructures ,2025-05-07 Recent Progress and Development in Nanostructures is a comprehensive exploration of the latest advancements in the rapidly evolving field of nanotechnology This book investigates nanostructure synthesis characterization and applications showcasing their transformative potential in energy environment healthcare and beyond With contributions from leading experts the book highlights the crucial role of nanostructures in addressing global challenges Topics include innovative synthesis methods advanced characterization techniques and emerging applications in catalysis sensors drug delivery and energy storage systems It also explores hybrid nanostructures self assembled materials and the integration of nanotechnology into sustainable and green solutions Tailored for researchers professionals and students the book balances theoretical insights and practical applications Each chapter provides a detailed discussion of recent breakthroughs supported by in depth analysis and experimental findings Special emphasis is placed on interdisciplinary approaches that bridge chemistry physics and material science underscoring the collaborative nature of modern nanotechnology research The book also addresses the challenges in scalability cost effectiveness and environmental impact associated with nanostructures offering solutions and future directions With an engaging narrative and illustrative content Recent Progress and Development in Nanostructures is an invaluable resource for advancing knowledge and fostering innovation in this dynamic field Whether you are an academic industry professional or enthusiast this book will inspire and guide your journey into the fascinating world of nanostructures

Antimalarial Natural Products A. Douglas Kinghorn,Heinz Falk,Simon Gibbons,Yoshinori Asakawa,Ji-Kai Liu,Verena M. Dirsch,2022-01-02 This volume begins with a short history of malaria and follows with a summary of its biology It then traces the fascinating history of the discovery of quinine for malaria treatment and then describes quinine s biosynthesis its mechanism of action and its clinical use concluding with a discussion of synthetic antimalarial agents based on quinine s structure It also covers the discovery of artemisinin and its development as the source of the most effective current antimalarial drug including summaries of its synthesis and biosynthesis its mechanism of action and its clinical use and resistance A short discussion of other clinically used antimalarial natural products leads to a detailed treatment of additional natural products with

significant antiplasmodial activity classified by compound type Although the search for new antimalarial natural products from Nature s combinatorial library is challenging it is very likely to yield new antimalarial drugs This book thus ends by identifying ten natural products with development potential as clinical antimalarial agents
